**Build AI-Enhanced Web Apps** Theo Despoudis, 2026-03-17 This book shows you step by step and example by example how to build sites and applications that take advantage of large language models LLMs like GPT Claude and Llama Written especially for web developers comfortable with React or Next js this book introduces the tools and techniques you need to add sophisticated AI features like Retrieval Augmented Generation RAG document summarization chatbots and more to your web based projects It guides you through AI development using only JavaScript and other common web dev skills no Python or Machine Learning experience required You ll learn by working with full scale AI projects that solve actual business problems You ll soon be delivering user friendly efficient interfaces that make the absolute best use of AI tech In Build AI Enhanced Web Apps you ll learn how to Integrate AI models into React and Next js applications Implement streaming responses and real time AI interactions Manage conversation history and context in chat applications Implement LangChain js for complex AI workflows and reasoning Build a web application for summarizing documents using LangChain js Utilize Retrieval Augmented Generation RAG systems for knowledge management Develop an AI powered interview preparation system with voice feedback About the technology The users have spoken Agents personalized responses and other LLM powered features are required in modern web applications Build AI Enhanced Web Apps presents the end to end architecture of AI web apps including UI backend infrastructure data processing API integration deployment and scaling with examples and language perfect for professional web developers About the book This accessible book shows you how to ship real AI features not just toy demos using a JavaScript stack you already know React for UI Next js for backend integration and the Vercel AI SDK to connect to LLMs like Gemini and GPT In it you ll acquire the skills you need to complete two portfolio ready projects a voice based interview assistant and a RAG powered corporate knowledge system You ll also learn how to design workflows that balance latency cost and UX and implement responsible guardrails for security quality control hallucinations and bias What s inside Build AI features using a professional stack Ship production ready features Learn from concrete projects About the reader For web developers familiar with JavaScript and React About the author Theo Despoudis is a Senior Engineer at WP Engine specializing in AI powered search and headless WordPress He is an expert in integrating LLMs RAG and Vercel AI SDK into React and Next js apps Table of Contents Part 1 1 Using generative AI in web apps 2 Building your first generative AI web application 3 Connecting AI models with the Vercel AI SDK 4 Managing conversation and state in your application Part 2 5 Prompt engineering in web applications 6 Building AI workflows with LangChain js 7 Document summarization and RAG with LangChain js 8 Testing and debugging techniques 9 Deployment and security Part 3 10 Building an AI interview assistant Project walk through 11 Building an AI RAG agent Project walk through Part 4 12 Integrating web apps with the Model Context Protocol A Running the examples **Generative AI Apps with LangChain and Python** Rabi Jay, 2024-12-26 Future proof your programming career through practical projects designed to grasp the

intricacies of LangChain's components from core chains to advanced conversational agents. This hands-on book provides Python developers with the necessary skills to develop real-world Large Language Model (LLM) based Generative AI applications quickly, regardless of their experience level. Projects throughout the book offer practical LLM solutions for common business issues such as information overload, internal knowledge access, and enhanced customer communication. Meanwhile, you'll learn how to optimize workflows, enhance embedding efficiency, select between vector stores, and other optimizations relevant to experienced AI users. The emphasis on real-world applications and practical examples will enable you to customize your own projects to address pain points across various industries.

**Developing LangChain based Generative AI LLM Apps with Python** employs a focused toolkit: LangChain, Pinecone, and Streamlit. LLM integration practically showcases how Python developers can leverage existing skills to build Generative AI solutions. By addressing tangible challenges, you'll learn by doing, enhancing your career possibilities in today's rapidly evolving landscape.

**What You Will Learn:** Understand different types of LLMs and how to select the right ones for responsible AI. Structure effective prompts. Master LangChain concepts such as chains, models, memory, and agents. Apply embeddings effectively for search, content comparison, and understanding similarity. Setup and integrate Pinecone vector database for indexing, structuring data, and search. Build Q&A: those seeking a structured guide to enhance their careers by learning to create robust real-world LLM powered Generative AI applications. data scientists, analysts, and experienced developers new to LLMs.

**Unlocking the Potential of OpenAI's ChatGPT** DAVID YAO, Have you heard of OpenAI's ChatGPT but have no idea what it is or how to use it? Look no further. This book provides a comprehensive introduction to this revolutionary language model. In this book, the author takes you through the history of ChatGPT and its capabilities, as well as its practical applications in fields such as customer service, content creation, and data analysis. You'll also learn how ChatGPT works and what sets it apart from other language models. But that's not all: the book also provides hands-on examples and tutorials to help you put your newfound knowledge into practice. The author will also address the limitations of the model and provide tips on how to achieve optimal results. Whether you're a data scientist, business owner, or student, this book is a must-read for anyone looking to understand and utilize the power of ChatGPT. With its comprehensive understanding of ChatGPT and its potential to transform the way we work and learn, this book is sure to be a valuable resource. So why wait? Get your hands on a copy today and let OpenAI's ChatGPT work for you.

**Open AI and Computational Intelligence for Society 5.0** Pandey, Rajiv, Srivastava, Nidhi, Prasad, Rajesh, Prasad, Jayashree, Garcia, Manuel B., 2024-11-29. As technology rapidly advances, the complexity of societal challenges grows, necessitating intelligent solutions that can adapt and evolve. However, developing such solutions requires a deep understanding of computational intelligence (CI) and its application in addressing real-world problems. Moreover, ethical considerations surrounding AI, such as bias and accountability, are crucial to ensure responsible development and deployment of intelligent systems. *Open AI and Computational Intelligence for Society 5.0* offers a

comprehensive exploration of CI providing insights into intelligent systems theory design and application This book is a practical guide for scientists engineers and researchers seeking to develop thoughtful solutions for complex societal issues Integrating disruptive technologies and frameworks illuminates the path toward creating intelligent machines collaborating with humans to enhance problem solving and improve quality of life Ethics of Virtual Reality Michael J.

Grabowski,2024-12-15 In this book Michael Grabowski draws on established theories of ethics to consider critical questions surrounding the growing adoption of virtual reality VR technologies These questions include who should control and have access to VR its impact on privacy its potential for misrepresentation and bias and how to provide a platform for free expression while mitigating harassment and abuse Grabowski examines use cases of other digital technologies including social media and artificial intelligence to examine who is helped and harmed by the widespread implementation of VR and how it might transform existing institutions social relationships and communication Finally Grabowski forecasts the possible futures of VR and what limits if any should be placed on representing the real world or imagining new ones Scholars of media studies technology studies communication and ethics will find this book of particular interest **Generative AI, Contracts,**

**Law and Design** Marcelo Corrales Compagnucci,Helena Haapio,Mark Fenwick,2025-11-22 This book explores how generative AI and design are reshaping the law legal communication and contracting moving beyond automation toward collaboration and meaningful outcomes Combining theory and practice it addresses challenges such as privacy communication financial well being responsible AI use and the language of contracts This edited book breaks new ground in exploring how generative AI and design are acting as catalysts for change in law legal communication and contracting Together they are transforming the way we think and act moving beyond automation toward collaboration actionability and achieving goals Bringing together theoretical insights and practical experiments the book features contributions from scholars and practitioners working at the intersection of law business technology and design Chapters address topics such as AI enhanced financial well being and debt support bridging the implementation gap in contracting improving the usability of privacy communication and health data and protecting artistic style in the age of AI Threaded through these diverse contributions common questions emerge If the purpose of contracts is to establish and achieve common goals why does their language so often seem arcane like a magic spell and how can AI help us change that How can we responsibly integrate AI into legal health and commercial information to enhance usability and understanding What does responsible AI use look like in practice and how can design principles guide it This book provides legal professionals technologists designers business leaders and policymakers with the insight and tools necessary to shape the future of law and contracts creatively and critically Mind-Reading and Artificial Intelligence: Past, Present and Future Prof. (Dr.) Jai Paul Dudeja,2024-10-30 Mind reading typically refers to the ability of discerning or interpreting someone else s thoughts feelings or intentions Mind Reading has two components human based and ii device based artificial intelligence Artificial Intelligence AI refers to

programming computers to do tasks that normally require human intelligence like learning problem solving and understanding language It is like giving computers the ability to think and make decisions on their own similar to how humans do AI helps machines learn from data adapt to new situations and perform tasks without being explicitly programmed for each step This book covers the topics on human based and device based mind reading and interpretation artificial intelligence that is divided into 32 chapters and the following 8 sections i Mind Reading and Artificial Intelligence Introduction and Overview ii Human Based Mind Reading iii Artificial Intelligence Introduction Types of Learning iv Device Based Mind Reading And Virtual Assistants v Applications and Opportunities of Artificial Intelligence vi Artificial Intelligence Ethical Issues Risks and Regulations vii Artificial Consciousness and viii Artificial Intelligence in India Status and the Way Forward
