Habitats and Biota of the Gulf of Mexico: Before the Deepwater Horizon Oil Spill C. Herb Ward,2017-06-26 This book is open access under a CC BY NC 2.5 license The Gulf of Mexico is an open and dynamic marine ecosystem rich in natural resources but heavily impacted by human activities including agricultural industrial commercial and coastal development The Gulf of Mexico has been continuously exposed to petroleum hydrocarbons for millions of years from natural oil and gas seeps on the sea floor and more recently from oil drilling and production activities located in the water near and far from shore Major accidental oil spills in the Gulf are infrequent two of the most significant include the Ixtoc I blowout in the Bay of Campeche in 1979 and the Deepwater Horizon Oil Spill in 2010 Unfortunately baseline assessments of the status of habitats and biota in the Gulf of Mexico before these spills either were not available or the data had not been systematically compiled in a way that would help scientists assess the potential short term and long term effects of such events This 2 volume series compiles and summarizes thousands of data sets showing the status of habitats and biota in the Gulf of Mexico before the Deepwater Horizon Oil Spill Volume 2 covers historical data on commercial and recreational fisheries with an analysis of marketing trends and drivers ecology populations and risks to birds sea turtles and marine mammals in the Gulf and diseases and mortalities of fish and other animals that inhabit the Gulf of Mexico **100 Heartbeats** Jeff Corwin,2009-10-27 It's no secret that our planet and the delicate web of ecosystems that comprise it is in crisis Environmental threats such as climate change pollution habitat loss and land degradation threaten the survival of thousands of plant and animal species each day In 100 Heartbeats conservationist and television host Jeff Corwin provides an urgent palpable portrait of the wildlife that is suffering in silence and teetering on the brink of extinction From the forests slipping away beneath the stealthy paws of the Florida panther to the giant panda's plight to climb ever higher in the mountains of China in search of sustenance to the brutal poaching tactics that have devastated Africa's rhinoceros and elephant populations Corwin takes readers on a global tour to witness firsthand the critical state of our natural world Along the way he shares inspiring stories of battles being

waged and won in defense of the earth's most threatened creatures by the conservationists on the front lines. These stories of hope and progress underscore an important message: Our own survival as well as that of the world's wildlife is in our hands. The race to save the planet's most endangered wildlife is under way. Every heartbeat matters. **Print** Martha T.
