

Introduction to Economics Study Guide

- Define **economics**. Explain how economics applies to the real world.
 - **Economics** is a social science that studies how individuals, governments, firms, and nations make choices on allocating scarce resources to satisfy their unlimited wants. Economics tells us how to make the best use of our scarce resources and is usually divided into two categories: Microeconomics and macroeconomics
- Define **opportunity cost**. Identify the opportunity cost of various decisions made by individuals and societies.

 - **Positive economics** is objective and fact-based, while **normative economics** is subjective and value-based. Positive economic statements do not have to be correct, but they must be able to be tested and proved or disproved. Normative economic statements are opinion based, so they cannot be proved or disproved.
