Financial Aid Goodreads Choice Guide:

The Creative Writer's Survival Guide John McNally, 2010-04-15 I write this blurb in distress because for years I've been stealing John McNally's sharp insights into writing and publishing and passing them off as my own. Now this generous so and so is sharing his vast experience as a writer and editor with everyone. Worse yet, this book, despite its instructional value, is irresistibly unputdownably readable. Timothy Schaffert, author *Devils in the Sugar Shop* *The Quick-Start Library Guide* Kelly Mayfield, Amy O. Milstead, 2025-09-04 A practical guide for new school librarians entering the field as well as an introduction to basic library science skills for non-professionals who manage school libraries *Library Programs and Services* G. Edward Evans, Margaret Zarnosky Saponaro, Holland Christie, Carol Sinwell, 2015-06-30 Covering every essential topic ranging from circulation and literacy instruction to reference and security, this benchmark text provides an up-to-date, broadly based view of library public service and its functions. Supplying essential foundational reading for students of library public services as well as an up-to-date overview for practitioners who wish to refresh their knowledge or acquaint themselves with a new area of responsibility, this book's broad and solid coverage will benefit anyone concerned with developing or maintaining the public face of the library. A revision and expansion of *Libraries Unlimited's Introduction to Library Public Services*, Seventh Edition, this edition has new chapters covering such topics as e-resources, collections, print and other media, and facilities and funding. Additionally, every chapter has been substantially updated and reorganized to better reflect the role of technology in library services today. The book begins with background information on public services in libraries and an analysis of the library's public service philosophy. Then the authors delve into staffing and assessment of services, moving logically to major functional areas of public services: reference, instruction, document delivery, circulation, and reserves, collections, programming, safety and security, issues, and facilities and funding. Real-life anecdotes from public, academic, and school libraries illustrate principles and concepts throughout the book. For each topic, the authors detail its role and philosophy and offer key points to remember, references, and lists for further reading. **The Collection Program in Schools** Marcia A. Mardis, 2016-02-25 This thorough treatment of collection development will serve school library educators and students as well as practicing school librarians, providing quick access to information that is both immediately useful and helpful as unforeseen situations arise. Our digitally rich world changes quickly and contains more information resources than ever before, as a result, school librarians are tasked with the enormous challenge of curating a diverse, high-quality and up-to-date collection for teachers, students, and administrators to use. This new edition of *The Collection Program in Schools* gives school librarians the tools to develop and maintain a collection in a constantly changing environment, often with reduced budgets, and to ensure that students can use virtual libraries and have access to all modern media and learning resources. The book logically progresses in its coverage of national and state policy concerns to community needs to the process of collection building and maintenance. Topics covered include key education trends affecting collections such as digital

textbooks and other non print resources instructional improvement systems STEM priorities and open education resources the use of school libraries as makerspaces media type considerations for a range of users Common Core State Standards and Next Generation Science Standards and the principles of curation acquisition description organization promotion evaluation and maintenance This guide is ideal for use in many graduate level school librarian preparation courses including classes on school library collection development and school library management
