[BIM Geometry with Julia Plasm—Functional Language for CAD Programming](#) Alberto Paoluzzi, Giorgio Scorzelli, 2026-01-01

This book provides computational methods tools algorithms code scriptlets and examples for symbolically generating simple and very complex geometric shapes as solid models and structures for Building Information Modeling BIM environments

The book introduces the Programming Language for Symbolic Solid Modeling Plasm a concise symbolic design language for the construction

industry It explains how to utilize the recent adaptation to the MIT originated language Julia regarded as the premier modern language for scientific computing In this context the design is stored as a solid model and can be utilized by other Julia packages e g for mechanical thermal simulation etc It is important to note that very complex shapes including Boolean textures for new materials may be challenging if not impossible to describe using architectural CAD and even harder to encode within the entity class representation methods of the BIM collaboration standard On the other hand Plasm jl product object descriptions are straightforward to encode and symbolically export import They can be used as source strings within IFC files the collaborative platform for construction The sender and receiver of such files can receive the symbolic description the geometric breakdown atoms of Boolean algebra exported in the standard and the precise integral properties surface volume inertia The Julia Plasm language is an outstanding environment for teaching computer courses to architecture students and introducing BIM to new generations of ABC professionals who are already familiar with network tools and will create and innovate with geometric shapes while learning computational methods The PLASM language is a preeminent environment to teach computer courses to architecture students and introduce BIM to the new generations of ABC pros who are already acquainted with network instruments and will create and innovate with geometric shapes while learning computational methods
