

EB1 RECOMMENDATION LETTER SAMPLE

BESTGhostWriters.NET

To the Office of Immigration Services:

It is my pleasure to write this letter of recommendation for Mr. Gary Patel, a highly talented scientist, to support his application for a skilled worker EB-1 visa. I have known Mr. Patel for the past five years and have collaborated with him regularly on scientific projects. Mr. Patel is a motivated and creative individual who has already established himself as a respected researcher in his own country. I believe that the resources that would be available to him should he be allowed to work in the United States would greatly benefit his scientific career, as well as be a great boon to the scientific community.

It was during an international conference in stem cell metabolism that I first met Dr. Patel. He presented highly innovative and original research on using metabolic precursors to induce different cell fates, rather than the traditional synthetic proteins currently used, which are expensive and difficult to produce. Over the years, I have corresponded regularly with him, and we have collaborated on several projects illustrating the different nutritive and metabolic needs of developing and differentiating cells. I believe that his research would be able to advance to the next level given the resources and scientific network here in the United States.

I can also highly commend Dr. Patel's sense of integrity and values. He has time and time again declined opportunities to market his research and commercialize on his research because he believes that it would be a conflict of interest that would impact the quality of his science. He is a highly likeable and collaborative individual, and I know that the scientific community here would benefit greatly from his research. This EB-1 Visa would allow him to stay and work in the United States, using the latest in techniques and technology to continue to further scientific knowledge.

Thank you very much for your time. Please do not hesitate to contact me with any questions.

Sincerely,
Robert Endows, PhD
Professor of Developmental Biology
