More than 1000 illustrations convey to the learner various concepts and real-world aspects of electrical practices, a range of fully worked examples including engineering mathematical fundamentals and review questions support student learning while assessment style worksheets support the volume of assessment. *Electrotechnology Practice* has strong coverage of the electives for Certificate II and Certificate III preparing students to eligibly sit for the Capstone Assessment or the Licenced Electrician's Assessment LEA as a mandatory requirement to apply for an Electrician's Licence Premium. Online teaching and learning tools are available on the MindTap platform. *Electrical Trade Practices 2nd edition* Ralph Berry, Frank Cahill, Phillip Chadwick, 2019-02-01. Written to the core practical units of competency from the UEE11 Electrotechnology Training Package, *Electrical Trade Practices 2e* by Berry, Cahill and Chadwick provides a practical yet comprehensive companion text covering the practical units within the UEE30811 Certificate III in the Electrotechnology Electrician qualification. *Electrical Trade Practices* is the practical volume to accompany Phillips' *Electrical Principles*.

Electrical Principles Peter Phillips, 2019-06-01. Phillips' *Electrical Principles* uses a student-friendly writing style, a range of fully worked examples and full colour illustrations to make the basic principles easier to understand. Covering the core knowledge components of the current UEE11 Electrotechnology Training Package and referencing the new AS/NZS 3000:2018 Wiring Rules, this textbook is structured, written and illustrated to present the information in a way that is accessible to students. With a new focus on sustainable energy, brushless DC motors and the inclusion of student ancillaries as well as structuring more closely to the knowledge and skills requirements for each competency unit covered, *Electrical Principles 4e* is the ideal text for students enrolled in Certificate II and III Electrotechnology qualifications. With more than 800 diagrams, hundreds of worked examples, practice questions and self-check questions, this edition is the most up-to-date text in the market. The writing style is aimed at Certificate III students while retaining the terminology typically used in the Electrical Trades. Additionally, the technical content does not break into a level above that of Certificate III. At all times, the book uses illustrations integrated with the text to explain a topic.
