Streaming Wars Charlotte Henry, 2025-10-03 Streaming didn't just change what we watch. It changed who holds the power in entertainment. *Streaming Wars* reveals how platforms like Netflix, Disney, Apple TV, Spotify, and Amazon Prime have transformed more than just entertainment. They've rewritten the rules of streaming services, media economics, power, and visibility. Journalist Charlotte Henry explores what's really going on behind your screen, from Hollywood's 2023 strikes to the rise of ad-supported tiers, the global race for live sports, and the slow fade of traditional TV. With a sharp, accessible lens, Henry breaks down how AI, rebundling, and fierce platform competition are driving a new era of streaming and why this shift matters now. Perfect for anyone who wants to understand how streaming is reshaping culture, business, and what we watch. Themes include streaming disruption, media economics, cultural visibility, platform competition, Hollywood strikes, and the future of entertainment.

Technology Penny Crofts, Honni van Rijswijk, 2021-04-30 Placing contemporary technological developments in their historical context, this book argues for the importance of law in their regulation. Technological developments are focused upon overcoming physical and human constraints. There are no normative constraints inherent in the quest for ongoing and future technological development. In contrast, law proffers an essential normative constraint. Just because we can do something does not mean that we should. Through the application of critical legal theory and jurisprudence to proactively engage with technology, this book demonstrates why legal thinking should be prioritised in emerging technological futures. This book articulates classic skills and values such as ethics and justice to ensure that future and ongoing legal engagements with socio-technological developments are tempered by legal normative constraints. Encouraging them to foreground questions of justice and critique when thinking about law and technology, the book addresses law students and teachers, lawyers, and critical thinkers concerned with the proliferation of technology in our lives.
