Atlas Of Surface Palpation:

Atlas of Surface Palpation Serge Tixa, 2015-12-02 Serge Tixa presents in this highly popular book a method of palpatory anatomy called Manual Exploration of Surface Anatomy (MESA). MESA locates anatomical structures important to clinical examination allowing careful selection of the most appropriate manual therapy technique or manoeuvre. The new edition presents precisely and visually the various anatomical structures with the help of more than 130 colour illustrations and close to 900 black and white photographs. For every photograph showing an anatomical structure accessible to palpation a model whose physique shows the structure clearly has been chosen. Each chapter has up to four subsections treating the various aspects of each body region. These cover osteology, myology, musculotendinous structures, arthrology (joints and ligaments) and lastly nerves and blood vessels. Each photograph is carefully presented and accompanied by a section of text describing the method of approach to finding the structure concerned. Whenever necessary reminders essential for the proper use of the methods of approach, attachments, actions and innervations are included. Clinical notes highlight the link between palpation and clinical diagnoses. *Atlas of Surface Palpation: Anatomy of the Neck, Trunk, Upper and Lower Limbs* is aimed at students and practitioners who need a method of applied anatomy in their practice. All new artwork programme enhances accessibility and learning. Useful template approach aids ready understanding and allows the reader to go at his or her own speed. Presents almost 600 photographs and line artworks to render the learning experience as easy as possible. Contains over 160 pull out boxes to act as useful aide memoires. Clinical Hints and Tips boxes indicate points of relevance for the clinic. Methods of approach illustrated with many new photographs. Anatomical drawings have been completely redesigned to improve clarity. Clinical Notes boxes. Glossary. Inclusion of Dermatomes. *The Journal of the American Osteopathic Association*, 1913

Atlas of Palpatory Anatomy of Limbs and Trunk Serge Tixa, 2003 Swiss School of Osteopathy Switzerland. Text presents a method of palpatory anatomy based on the manual inspection of surface forms. Includes general presentations of human anatomy. Topographic and structural presentations are also featured. Each section provides illustrations by the late Frank H Netter MD. For physical therapists and sports trainers. Product Description *Anatomy* Derek Field, 2000 *Field's Anatomy, Palpation and Surface Markings - E-Book* Derek Field, Jane Owen Hutchinson, 2012-08-14. Now in its fifth edition this reliable resource continues to be a practical guide to identification and palpation of significant anatomical landmarks and structures. With a combination of clear text, drawings and photographs it helps the student to acquire knowledge of structures and movements palpable below the surface and to develop their tactile skills. The new edition now incorporates educational aids such as full colour photographs and drawings along with access to an online resource of 100s of self assessment questions which gives the student the opportunity to check their knowledge and receive feedback. Introductory chapter on the principles and practice of palpation vital to background study. Step by step guide to identification and palpation of structures. Facilitates learning by providing a clear and concise approach. Offers basic information on accessory movements.
