Axiomatic Greg Egan:

Axiomatic Greg Egan, 1995-03-27 *Axiomatic* is a collection of eighteen short stories: The Infinite Assassin, The Hundred Light Year Diary, Eugene, The Caress, Blood Sisters, *Axiomatic*, The Safe Deposit Box, Seeing A Kidnapping, Learning to Be Me, The Moat, The Walk, The Cutie, Into Darkness, Appropriate Love, The Moral, Virologist, Closer, Unstable Orbits in the Space of Lies. *Visions of the Human in Science Fiction and Cyberpunk*, 2020-09-25 This collection of papers joins a growing body of work addressing what are arguably some of the most important questions faced in the 21st century: what does it mean to be human and what do we understand by humanity. [Human Technological Enhancement and Theological Anthropology](#) Victoria Lorrimar, 2022-05-05 A cross disciplinary theological engagement with proposals for the technological enhancement of humans including radical life extension, mind uploading, mood enhancement and moral enhancement. This work draws on metaphor studies, cognitive sciences and literary studies to develop an account of human creativity in relation to divine creativity. [Nanotech](#) Gardner Dozois, Jack Dann, 2013-03-25 Ten mind blowing tales from the cutting edge of technology. Imagine a technology that can change the structure and function of your own body or that can devour an entire country. This is nanotechnology: the creation of self replicating machines with the capability to build or alter almost any structure including the human form by manipulating atoms or molecules and it has captured the imaginations of science fiction writers and readers everywhere. Now these ten short tales will capture you: *Blood Music* by Greg Bear, *Margin of Error* by Nancy Kress, *Axiomatic* by Greg Egan, *Remember d Kisses* by Michael F Flynn, *Recording Angel* by Ian McDonald, *Sunflowers* by Kathleen Ann Goonan, *The Logic Pool* by Stephen Baxter, *Any Major Dude* by Paul Di Filippo, *We Were Out of Our Minds with Joy* by David Marusek, *Willy in the Nano Lab* by Geoffrey A Landis. At the publisher's request, this title is sold without DRM Digital Rights Management. *The Big Book of Cyberpunk* Jared Shurin, 2023-09-26 A genre defining and redefining collection of the boldest, most rebellious and most prescient speculative fiction featuring stories from all over the globe. The sky above the port was the color of television tuned to a dead channel. Almost forty years ago, William Gibson wrote the line that began *Neuromancer* and a movement that would change the face of science fiction. Award winning anthologist Jared Shurin brings together over a hundred stories from more than twenty five countries that both establish and subvert the classic cyberpunk tropes and aesthetic from gritty near future noir to pulse pounding action. Urban rebels undermine monolithic corporate overlords. Daring heists are conducted through back alleys and the darkest parts of the online world. There's dangerous new technology, cybernetic enhancements, scheming AI, corporate mercenaries, improbable weapons and roguish hackers. These tales examine the near now, extrapolating the most provocative trends into fascinating and plausible futures. We live in an increasingly cyberpunk world packed with complex technologies and globalized social trends. A world so bizarre that even futurists couldn't explain it, though many authors in this book have come closer than most. As both an introduction to the genre and the perfect compendium for the lifelong fan, *The Big Book of Cyberpunk* offers a hundred ways to understand

Science Fiction & Fantasy Book Review Annual ,1991 **Transrealist Fiction** Damien Broderick,2000-06-30

Transrealist writing treats immediate perceptions in a fantastic way according to science fiction writer and mathematician Rudy Rucker who originated the term In the expanded sense argued in this book it also intensifies imaginative fiction by writing the fantastic from the standpoint of richly personalized experience Transrealism is also related to slipstream writing another category introduced into studies of speculative fiction to account for texts that seem to follow trajectories mapped by the huge body of science fiction accumulated in the last century while retaining a central interest in traditional literary strategies This book examines a variety of work from the transrealist perspective something that has not been done previously It emphasizes the texts of Philip K Dick and Rucker himself while it additionally engages the texts of such slipstream writers as Kurt Vonnegut J G Ballard and John Barth It places its argument against the antihumanist trend in science fiction and builds comparisons with more traditional varieties of science fiction works The Best of Greg Egan Greg Egan,2019 Greg Egan is arguably Australia s greatest living science fiction writer In a career spanning more than thirty years he has produced a steady stream of novels and stories that address a wide range of scientific and philosophical concerns artificial intelligence higher mathematics science vs religion the nature of consciousness and the impact of technology on the human personality All these ideas and more find their way into this generous and illuminating collection the clear product of a man who is both a master storyteller and a rigorous exploratory thinker The Best of Greg Egan contains twenty stories and novellas arranged in chronological order and each of them is a brilliantly conceived painstakingly developed gem The book opens with Learning to be Me about a society in which the organic human brain can be replaced by a miraculous piece of technology called the jewel a mock brain that confers among other things a kind of immortality on its recipients Bit Players the opening movement in a trio of tales that continues with 3 adica and Instantiation posits a world in which cheaply generated software beings are exploited for the basest commercial purposes Other sets of interconnected stories all of them reprinted here include the mathematically themed Luminous and Dark Integers and a pair of stories centered on the complex marriage of a physicist and a mathematician Singleton and Oracle Reasons to be Cheerful concerns a young boy whose brain tumor has an unexpected effect on his life moods and view of the world Axiomatic tells the story of a society in which implants can be used to alter the human personality with potentially lethal results And the Hugo Award winning novella Oceanic is a powerful account of a boy whose deeply held religious beliefs are undermined by what he comes to learn about the laws of the physical world This book really does represent the best of Greg Egan Projections Lou Anders,2004 Examines the history and people the science and the society the lives times and themes the cultural impact and the critical response of the dynamic genre that is speculative fiction *American Book Publishing Record* ,1998
