Applied Nonparametric Statistical Methods Nigel Smeeton, Neil Spencer, Peter Sprent, 2025-03-31 Nonparametric statistical methods minimize the number of assumptions that need to be made about the distribution of data being analysed unlike classical parametric methods As such they are an essential part of a statistician s armoury and this book is an essential resource in their application Starting from the basics of statistics it takes the reader through the main nonparametric approaches with an emphasis on carefully explained examples backed up by use of the R programming language Key features of this fully revised and extended fifth edition include the following An introductory chapter that provides a gentle introduction to the basics of statistics including types of data hypothesis testing confidence intervals and ethical issues An R package containing functions that have been written for the examples in the text and the exercises Summary bullet points at the end of each section to enable the reader to locate important principles quickly A case study from medical research to demonstrate nonparametric approaches to the data analysis Examples fully integrated into the text drawn from published research on contemporary issues with more detail given in their explanation Extensive exercises along with complete solutions that allow the reader to test their understanding of the material Articles used in the examples and exercises carefully chosen to enable readers to identify up to date literature in their field for research publications and teaching material Numerous historical references throughout the text from which to explore the origins of nonparametric methods

Applied Nonparametric Statistical Methods Fifth Edition is a comprehensive course text in nonparametric techniques suitable for undergraduate students of mathematics and statistics It assumes only basic previous experience of statistics and with algebra kept to a minimum it is also ideal for quantitative methods modules delivered to undergraduate or postgraduate students in science business and health service training It is an invaluable resource for researchers medical practitioners business managers research and
