The Privatisation of Knowledge Massimo Florio, 2023-09-14

This book deals with the emergence of intellectual monopolies It explores different ways of producing knowledge thus showing alternatives to the current dominant paradigm which is based on turning knowledge produced collectively into intangible assets owned by a few leading corporations It discusses a paradox knowledge creation by government sponsored research infrastructures RI or by non profit institutions including universities is increasingly appearing in the form of open science ideas and data are widely available in the public domain However such knowledge is privatised downstream by new oligopolies These oligopolies such as the Tech Giants are protected by legislation on intellectual property rights that restricts further access to knowledge This process contributes to increasing social inequality The book suggests alternative policy options to counteract this process the design of new players with a public mission and a coalition of governments as patient investors for the long term benefit not just of the citizens of one jurisdiction but for creating global public goods Proposals are presented for launching European R D infrastructures related to three major long term challenges health risks climate change and Big Data governance These knowledge intensive enterprises should offer innovation as a public good for example in new biomedical fields underinvested by private firms disruptive green technologies digital platforms based on transparent users ownership of data Offering a balanced combination of theories and practical applications including interesting case studies the book will appeal to students scholars and researchers of public economics and governance It will also find an audience among policymakers practitioners and government officials

How to Save the Internet Nick Clegg, 2025-09-04

A wake up call we cannot afford to ignore TONY BLAIR A vital read for anyone building or regulating the next era of technology REID HOFFMAN The global open internet is fragmenting As democracies seek to rein in the power of Big Tech as Silicon Valley pivots to an America first agenda as authoritarian regimes such as China and Russia segregate their populations from the rest of the internet the most powerful tool ever created for bringing the world together risks being dismantled Taking us behind the scenes at Meta and his interactions with world leaders Nick Clegg Meta s former President Global Affairs sets out where Big Tech has gone wrong how Silicon Valley s insularity has blinded it to its missteps and the radical reforms of the global platforms that are now needed if they are to secure a long term future But he also makes the case that many of the charges against them including that their algorithms polarise manipulate and harm are vastly overstated or simply untrue And while new laws that regulate these corporations are essential imposing national borders on the internet cannot be the answer That will fatally undermine its capacity for knowledge sharing collaboration education trade medical and scientific research and ultimately for the improvement and empowerment of billions of lives Radical reasonable deeply felt and disarmingly honest *How To Save the Internet* sets out a blueprint for the global cooperation we need in order to reform Big Tech while preserving the fundamental openness of the internet on which our future so depends A gripping and timely book
