The Emu ,1906      Cuckoos, Cowbirds and Other Cheats Nick Davies,2010-09-30 This fascinating study describes the natural histories of these brood parasites and examines many of the exciting questions they raise about the evolution of cheating and the arms race between parasites and their prey Brood parasites fill their armoury with adaptations including exquisite egg mimicry rapid laying ejection of host eggs murder of host young chick mimicry and manipulative begging behaviour ploys shown by recent research to have evolved in response to host defence behaviour or through competition among the parasites themselves While many host species appear defenceless accepting parasite eggs quite unlike their own many are more discriminating against odd looking eggs and some have evolved the ability to discriminate against odd looking chicks as well How is this arms race conducted Will defenceless hosts develop defences in time or are there constraints which limit the evolution and perfection of host defences And why are so few species obliged only to lay eggs in host nests Have host defences limited the success of brood parasitism or is it in fact much more common than we suspect but occurring mainly when birds parasitize the nest of their own kind All of these puzzles are examined in descriptions of the natural history of each of the groups of parasites in turn Here is a book with wide appeal both to amateur naturalists fascinated by this most singular and macabre of behaviours and by ornithologists and ecologists interested in the evolution of ecology and behaviour The story takes us from the classic field work by pioneer ornithologists such as Edgar Chance Stuart Baker Herbert Friedmann and others through to the experimental field work and molecular techniques of today s leading scientists We visit brood parasites in Europe Asia Japan Africa Australasia and North and South America to look at some of the world s most interesting birds and some of biology s most interesting questions many of which still beg answers from ornithologists in the future Brilliant illustrations by David Quinn illuminate the species discussed showing many behaviours never before illustrated and conveying the thrill of watching these astonishing birds in the wild      *A Study on Parasitism in the Cuckoos* Francis Charles Robert Jourdain,1925      **The Emu** ,1936      **Birds of East Africa** Terry Stevenson,John Fanshawe,2004-12-01 This is the first comprehensive field guide dealing exclusively with the birds of this spectacular region It covers all resident migrant and vagrant species found in Kenya Tanzania Uganda Rwanda and Burundi Over 1300 species are illustrated with full details all the plumages and major races likely to be encountered Concise text describes identification status range habits and voice with range maps for each species This authoritative book will not only be an indispensable guide to the visiting birder but also a vital tool for those engaged in work to conserve and study the avifauna of this region East Africa shelters a remarkable diversity of birds many seriously endangered with small and vulnerable ranges They form a constantly colourful noisy and highly extrovert part of the landscape      *The Book of Poultry* Thomas Fletcher McGrew,1921
