Authenticity In Materials Development For Language Learning:

Authenticity in Materials Development for Language Learning Alan Maley, Brian Tomlinson, 2017-11-06 This volume makes a unique contribution to the literature on materials development for language learning. It focuses on issues related to authenticity in materials development and includes research-based position statements, applications of theory to practice, and developments of theory from observed practice. Each paper concentrates on a different aspect of authenticity, and many of them introduce the reader to previously unexplored facets of authenticity. The chapters are sequenced so that the book moves from general discussion about the value of authenticity to reports of evaluations of authenticity to reports of the exploitation of authenticity in specific learning contexts. Many questions are raised, much revealing data is reported and analysed, and many pedagogic suggestions are made. The contributions here have been written so that they are of potential value to teachers, materials developers, postgraduate students, and researchers. They are written to be academically rigorous but at the same time to be accessible to newcomers to the field and to experienced experts alike. *The Routledge Handbook of Materials Development for Language Teaching* Julie Norton, Heather Buchanan, 2022-03-16 The Routledge Handbook of Materials Development for Language Teaching is the definitive resource for all working in this area of language and English language teaching. With 34 chapters authored by leading figures from around the world, the Handbook provides an historical overview of the development of language teaching materials, critical discussion of core issues, and an assessment of future directions. The contributions represent a range of different international contexts, providing insightful state-of-the-art coverage of the field. Structured in nine sections, the Handbook covers changes and developments in language teaching materials, controversial issues in materials development research, materials development for language learning and skills development, materials evaluation and adaptation, materials for specific contexts, materials development and technology, developing materials for publication, professional development, and materials writing. Demonstrating throughout the dynamic relationship between theory and practice, this accessible Handbook is essential reading for researchers, scholars, and students on MA programmes in ELT, TESOL, and applied linguistics.

Issues in Materials Development Maryam Azarnoosh, Mitra Zeraatpishe, Akram Faravani, Hamid Reza Kargozari, 2016-03-22 Issues in Materials Development provides readers with theoretical foundations and practical aspects of designing materials for EFL/ESL contexts. It starts with discussing some basic and preliminary principles of materials design, followed by scrutinizing critical issues in materials development in an objective and systematic way. This ranges from considering learners' needs, adopting/adapting selection and gradation of materials to the specific focus of the book on developing various types of materials for the four language skills: pronunciation, ESP vocabulary, and computer-assisted language learning materials. Authenticity of materials to be designed and the inclusion of affective factors to develop motivating materials to engage language learners, in addition to features of materials design at a universal level, are other areas to read about. This book finally tries to open new horizons and

possible futuristic approaches to improve today's ELT materials
