industrial policy has directed that nation s economy through nearly three decades of spectacular growth But the authors of
this paper maintain that this policy is showing signs of being outmoded The time has come the authors argue for the Korean
government to stop managing the economy s structural development and to redefine the responsibilities of business and
government Under this proposed compact the allocation of resources would shift from the government to the private
industrial and financial sectors The transformation of the government bureaucracy from an ad hoc policy role to one of a
transparent and predictable regulator is a key to the success of this undertaking These new directions would present the
government with enormous challenges Greater competitive discipline and regulatory oversight would be required While
dealing with the complexities of the transition the government would have to maintain macroeconomic stability and the
momentum of savings and investment For comparison the study examines the industrial economies of France Germany Japan
and the United States which underwent similar shifts *Resources in education* ,1985-02 **Information Processing**
