Working with AI c't-Redaktion, 2024-01-24 The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons, for example, you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally, and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training, and at work help to exploit opportunities and minimise risks. **HWM**, 2005-02 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews. *Deep Learning with Python* François Chollet, 2017-11-30 Summary: *Deep Learning with Python* introduces the field of deep learning using the Python language and the powerful Keras library.
