Reinforcement Learning Algorithms with Python Andrea Lonza, 2019-10-18 Develop self learning algorithms and agents using TensorFlow and other Python tools frameworks and libraries Key Features Learn develop and deploy advanced reinforcement learning algorithms to solve a variety of tasks Understand and develop model free and model based algorithms for building self learning agents Work with advanced Reinforcement Learning concepts and algorithms such as imitation learning and evolution strategies Book Description Reinforcement Learning RL is a popular and promising branch of AI that involves making smarter models and agents that can automatically determine ideal behavior based on changing requirements This book will help you master RL algorithms and understand their implementation as you build self learning agents Starting with an introduction to the tools libraries and setup needed to work in the RL environment this book covers the building blocks of RL and delves into value based methods such as the application of Q learning and SARSA algorithms You ll learn how to use a combination of Q learning and neural networks to solve complex problems Furthermore you ll study the policy gradient methods TRPO and PPO to improve performance and stability before moving on to the DDPG and TD3 deterministic algorithms This book also covers how imitation learning techniques work and how Dagger can teach an agent to drive You ll discover evolutionary strategies and black box optimization techniques and see how they can improve RL algorithms Finally you ll get to grips with exploration approaches such as UCB and UCB1 and develop a meta algorithm called ESBAS By the end of the book you ll have worked with key RL algorithms to overcome challenges in real world applications and be part of the RL research community What you will learn Develop an agent to play CartPole using the OpenAI Gym interface Discover the model based reinforcement learning paradigm Solve the Frozen Lake problem with dynamic programming Explore Q learning and SARSA with a view to playing a taxi game Apply Deep Q Networks DQNs to Atari games using Gym Study policy gradient algorithms including Actor Critic and REINFORCE Understand and apply PPO and TRPO in continuous locomotion environments Get to grips with evolution strategies for solving the lunar lander problem Who this book is for If you are an AI researcher deep learning user or anyone who wants to learn reinforcement learning from scratch this book is for you You ll also find this reinforcement learning book useful if you want to learn about the advancements in the field Working knowledge of Python is necessary

RAG-Driven Generative AI Denis Rothman, 2024-09-30 Minimize AI hallucinations and build accurate custom generative AI pipelines with RAG using embedded vector databases and integrated human feedback Get With Your Book PDF Copy AI Assistant and Next Gen Reader Free Key Features Implement RAG s traceable outputs linking each response to its source document to build reliable multimodal conversational agents Deliver accurate generative AI models in pipelines integrating RAG real time human feedback improvements and knowledge graphs Balance cost and performance between dynamic retrieval datasets and fine tuning static data Book Description RAG Driven Generative AI provides a roadmap for building effective LLM computer vision and generative AI systems that balance performance and

costs This book offers a detailed exploration of RAG and how to design manage and control multimodal AI pipelines By connecting outputs to traceable source documents RAG improves output accuracy and contextual relevance offering a dynamic approach to managing large volumes of information This AI book shows you how to build a RAG framework providing practical knowledge on vector stores chunking indexing and ranking You ll discover techniques to optimize your project s performance and better understand your data including using adaptive RAG and human feedback to refine retrieval accuracy balancing RAG with fine tuning implementing dynamic RAG to enhance real time decision making and visualizing complex data with knowledge graphs You ll be exposed to a hands on blend of frameworks like LlamaIndex and Deep Lake vector databases such as Pinecone and Chroma and models from Hugging Face and OpenAI By the end of this book you will have acquired the skills to implement intelligent solutions keeping you competitive in fields from production to customer service across any project What you will learn Scale RAG pipelines to handle large datasets efficiently Employ techniques that minimize hallucinations and ensure accurate responses Implement indexing techniques to improve AI accuracy with traceable and transparent outputs Customize and scale RAG driven generative AI systems across domains Find out how to use Deep Lake and Pinecone for efficient and fast data retrieval Control and build robust generative AI systems grounded in real world data Combine text and image data for richer more informative AI responses Who this book is for This book is ideal for data scientists AI engineers machine learning engineers and MLOps engineers If you are a solutions architect software developer product manager or project manager looking to enhance the decision making process of building RAG applications then you ll find this book useful

TEXT BOOK OF ARTIFICIAL INTELLIGENCE Dr. Rakesh Singh, Dr. Shuchi Dave, Prof. Sushil K. Kashaw, Prof. (Dr.) Sandeep Gangrade, Lalbihari Barik, 2025-04-25 Textbook of Artificial Intelligence is a comprehensive guide for students educators and professionals seeking foundational and advanced knowledge in AI It begins with a clear definition and history of Artificial Intelligence helping readers understand its roots and evolution The book explores real world applications of AI across various industries including healthcare finance education and autonomous systems Core AI branches like Machine Learning Deep Learning NLP Robotics and Computer Vision are introduced with practical insights In depth coverage of Intelligent Agents explains their structure types and operating environments The Problem Solving section walks readers through classic algorithms like BFS DFS A and adversarial search techniques Knowledge Representation and Reasoning introduces propositional logic predicate logic semantic nets and uncertainty models like Bayesian networks Machine Learning fundamentals cover supervised unsupervised and reinforcement learning alongside key algorithms and neural networks Advanced topics like CNNs RNNs Transformers GANs and NLP tasks are well structured for deeper understanding Dedicated chapters on AI in real world applications showcase use cases in robotics vision and recommender systems Hands on tools like TensorFlow PyTorch Keras and data handling with Pandas and NumPy are introduced for practical learning The book encourages ethical thinking with discussions on AI fairness privacy transparency and regulation A special focus on the future of AI covers trends like generative models autonomous agents and human AI collaboration Well organized content helps learners connect theory to practical implementation and innovation Step by step examples and algorithm breakdowns make complex topics easy to understand Each chapter includes conceptual summaries illustrations and review questions for better retention Perfect for beginners and intermediate learners as well as educators designing AI curricula Prepares students for research and industry careers with real world insights and project ideas Bridges the gap between traditional AI principles and modern AI technologies A valuable reference for anyone passionate about building intelligent systems and exploring the world of AI

ChatGPT eBook
GURMEET SINGH DANG, ChatGPT for Everyday Life Callisto Momesso, 2025-05-13 Unlock Your Personal AI Superpowers Discover How ChatGPT Can Transform Your Everyday Life Imagine a world where daily frustrations melt away where your schedule clicks into place effortlessly and where you have a brilliant tireless assistant ready to help with almost any task big or small That world is here and the key is in your hands ChatGPT for Everyday Life Your AI Assistant for Daily Tasks by Callisto Momesso invites you to step into the future of personal productivity and discover the transformative potential of Artificial Intelligence made astonishingly simple This isn't just another tech guide it's an exploration of empowerment It's about taking a revolutionary technology ChatGPT and turning it into your personalized co-pilot for

navigating the complexities of modern living Forget the hype and the jargon this booklet focuses on real world applications that deliver tangible benefits making AI accessible and genuinely useful for everyone regardless of your tech comfort level Embark on a journey to Become a Master Planner Learn to converse with ChatGPT to sculpt your weeks and days transforming chaotic commitments into clear actionable schedules Prioritize with AI insight and discover the power of AI assisted time blocking Reimagine Home Organization Turn meal planning from a chore into a creative collaboration with your AI Generate smart grocery lists design intelligent cleaning systems and find innovative budget friendly recipes Navigate Your World Smarter Let ChatGPT craft your communications for appointments and errands Uncover its ability to distill complex information and help you research local services like a pro Unleash Culinary Creativity Go beyond basic recipes Get AI generated meal ideas based on your pantry request clever substitutions for dietary needs and even co create meal plans for picky eaters or specific health goals Elevate Family Learning Partner with AI to create harmonious family routines Use it as an ingenious tool to explain difficult school subjects in fun engaging ways or to spark imagination with custom generated bedtime stories and educational games Free Your Mind Experience the relief of offloading the mental load Use ChatGPT as a digital confidante for brain dumping and thought organization or as an objective partner for weighing decisions Nurture Your Well being Discover how AI can support your self care journey with quick wellness routines tailored exercise ideas and insightful journaling prompts Solve Everyday Tech Puzzles Transform confusing tech speak into plain English Get help drafting support requests or understanding how to troubleshoot common device issues ChatGPT for Everyday Life is your invitation to experiment learn and personalize With clear explanations of prompting basics and a wealth of inspiring sample prompts like Help me decide should I go to the gym today or rest or Explain how to reset a Wi Fi router in simple steps you ll quickly gain the confidence to make ChatGPT your own The future of personal assistance is here It s intelligent it s versatile and with this guide it s incredibly easy to use Are you ready to unlock your AI superpowers and make everyday life significantly smoother Dive in and discover the possibilities

ChatGPT & Co. Rainer Hattenhauer,2024-09-18 Would you like to know how you can benefit from generative artificial intelligence AI Then this book will be of great help to you It shows you how AI can make your life easier and it will teach you what added value the current application scenarios of ChatGPT Midjourney and various other AI tools offer and where their limits lie Whether you want to write text conduct research generate images or create your own program code you can get started right away without any previous knowledge Bolstered with many practical examples from the most diverse areas of application this book presents ChatGPT as part of an ever growing toolkit and guides you on which tools to utilize and apply This is a valuable workbook for those looking to harness and incorporate ChatGPT and generative AI into their work studies or general life Key Features Demonstrates the profitable use of ChatGPT and other AI tools to make work easier at work and in everyday life Provides practical examples to help with perfect prompts Shows how to create impressive images with just a few words Provides programmers with powerful tools to

make the creation of professional software a child's play Dives deeper into the topic of text generative AI for advanced users and provides valuable tips and tricks

Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow
Aurélien Géron, 2019-09-05 Through a series of recent breakthroughs deep learning has boosted the entire field of machine learning Now even programmers who know close to nothing about this technology can use simple efficient tools to implement programs capable of learning from data This practical book shows you how By using concrete examples minimal theory and two production ready Python frameworks Scikit Learn and TensorFlow author Aurélien Géron helps you gain an intuitive understanding of the concepts and tools for building intelligent systems You'll learn a range of techniques starting with simple linear regression and progressing to deep neural networks With exercises in each chapter to help you apply what you've learned all you need is programming experience to get started Explore the machine learning landscape particularly neural nets Use Scikit Learn to track an example machine learning project end to end Explore several training models including support vector machines decision trees random forests and ensemble methods Use the TensorFlow library to build and train neural nets Dive into neural net architectures including convolutional nets recurrent nets and deep reinforcement learning Learn techniques for training and scaling deep neural nets

Transformers for Natural Language Processing and Computer Vision
Denis Rothman, 2024-02-29 The definitive guide to LLMs from architectures pretraining and fine tuning to Retrieval Augmented Generation RAG multimodal AI risk mitigation and practical implementations with ChatGPT Hugging Face and Vertex AI Get With Your Book PDF Copy AI Assistant and Next Gen Reader Free Key Features Compare and contrast 20 models including GPT BERT and Llama and multiple platforms and libraries to find the right solution for your project Apply RAG with LLMs using customized texts and embeddings Mitigate LLM risks such as hallucinations using moderation models and knowledge bases Book Description Transformers for Natural Language Processing and Computer Vision Third Edition explores Large Language Model LLM architectures practical applications and popular platforms Hugging Face OpenAI and Google Vertex AI used for Natural Language Processing NLP and Computer Vision CV The book guides you through a range of transformer architectures from foundation models and generative AI You'll pretrain and fine tune LLMs and work through different use cases from summarization to question answering systems leveraging embedding based search You'll also implement Retrieval Augmented Generation RAG to enhance accuracy and gain greater control over your LLM outputs Additionally you'll understand common LLM risks such as hallucinations memorization and privacy issues and implement mitigation strategies using moderation models alongside rule based systems and knowledge integration Dive into generative vision transformers and multimodal architectures and build practical applications such as image and video classification Go further and combine different models and platforms to build AI solutions and explore AI agent capabilities This book provides you with an understanding of transformer architectures including strategies for pretraining fine tuning and LLM best practices What you will learn Breakdown and understand the architectures of the Transformer BERT GPT T5 PaLM ViT CLIP
