The Power of Middle School Keen J. Babbage, 2012-09-14 The middle school years are a maze of academic duties human growth and self development discovering self identity and increasing social interaction with other people This maze can be an adventure of achievement and opportunity or it can be a struggle of difficulty and disappointment As these experiences are the impetus or foundation for many later achievements in academics careers and personal life it is imperative that educators maximize these formative years by helping middle school students successfully travel through this maze despite its ups and downs its twists and turns and its new challenges to master and the old issues to resolve For instance educators must support students who have fallen behind so as to thwart their reduced likelihood of turnaround in high school Likewise educators must challenge exceptional students in order to perpetuate their enthusiasm for learning and prepare them for college studies By discussing the comprehensive roles and duties of school administrators counselors and teachers The Power of Middle School addresses how to maximize middle school curriculum and extra curricular activities for the academic personal and professional benefits of all students

American Children in Chronic Poverty Cynthia E. Lamy, 2012-10-26 Why is it so difficult for some people to escape poverty Cynthia Esposito Lamy answers that question in American Children in Chronic Poverty Complex Risks Benefit Cost Analyses and Untangling the Knot by describing the complex and interacting knot of problems that children face as they grow up in poverty Through a vast store of research on topics related to children families and poverty and methods to estimate social return on investment Lamy determines which programs and policies produce benefits that exceed costs providing evidence

for an efficient fight against poverty Specific expert policy recommendations for keeping poverty from ruining children s potential are described within three broad themes bringing equity to our educational system supporting families as they transition through difficulties and making work pay Lamy concludes with foundational concepts for building an overarching model of poverty fighting to bring separate narrowly defined programs and policies together Benefit cost analysis confirms what the great religions have been trying to tell us for millennia when we respect and care for the most vulnerable members of our society we create a strong successful society in which everyone prospers
