

COURSE LEARNING OBJECTIVES

1. Discuss the strengths and weaknesses of the U.S. and selected global health care systems.
2. Develop and communicate a position on current health care policy.

GUIDING QUESTIONS

1. What is health policy? How can health policies be used as regulatory or allocative tools?

Health policy is a type of public policy, the aggregate of principles, stated or unstated, that characterize the distribution of resources, services and political influences that impact on the health of the population. Health policies may be used as regulatory tools in that they can on government to prescribe and control the behavior of a particular target group by monitoring the group and posing sanctions if it fails to comply. Ex: federally funded peer review organizations (PROs). Allocative tool, involve the direct provision of income, services or goods to certain groups of individuals or institutions. Allocative tools can be distributive or redistributive.

2. What are the principal features of U.S. health policy?

- Government as subsidiary to the private sector
 - National health care programs are built on a consensus that health care is a right of citizenship and that government should play a leading role in the delivery of health care
 - Private sector has played a dominant role
- Fragmented
 - Fragmentation of the governments power in the United States follows the design of the Founding Fathers, who developed a structure of "checks and balances" to limit governments power. Federal, state and local governments pursue their own policies, with little coordination of purpose or programs occurring.
- Incremental and piecemeal policies
 - Incremental and piecemeal health policies in the United States have been the result of compromises made to accommodate a variety of competing interests
 - Ex: broadening of the Medicaid program since its introduction in 1965
- Interest groups as demanders of policy
 - Health policy outcomes in the United States are heavily influenced by the demands of interest groups and the compromises struck to satisfy those demands. Each group fights hard to protect its own best interests
- Pluralistic Suppliers of Policy
 - Each branch and level of government can influence health policy. Both the executive and legislative branches at the federal, state and local levels can establish health policies, and the judicial branch can uphold, strike down or modify existing laws affecting health and health care at federal, state or local levels
- Decentralized role of the states
 - Under the theory of federalism, political power is shared between the federal government and the governments in each state. State governments dominant role in regulating managed care in the delivery of health care
- Impact of presidential leadership
 - To pass national policy initiatives, a strong presidential role is almost always necessary

3. What key health policies passed under the presidential leadership of FDR, Johnson, Nixon, Clinton, Bush, and Obama?

Johnson: Medicare and Medicaid

Nixon: HMO Act
