Copyright's Excess Glynn Lunney, 2018-04-12 For more than two hundred years copyright in the United States has rested on a simple premise more copyright will lead to more money for copyright owners and more money will lead to more original works of authorship In this important illuminating book Glynn Lunney tests that premise by tracking the rise and fall of the sound recording copyright from 1961 2015 along with the associated rise and fall in sales of recorded music Far from supporting copyright's fundamental premise the empirical evidence finds the exact opposite relationship more revenue led to fewer and lower quality hit songs Lunney's breakthrough research shows that what copyright does is vastly increase the earnings of our most popular artists and songs which net result means fewer hit songs This book should be read by anyone interested in how copyright operates in the real world

Mastering Large Datasets with Python John

Wolohan, 2020-01-15 Summary Modern data science solutions need to be clean easy to read and scalable In *Mastering Large Datasets with Python* author J T Wolohan teaches you how to take a small project and scale it up using a functionally influenced approach to Python coding You'll explore methods and built-in Python tools that lend themselves to clarity and scalability like the high performing parallelism method as well as distributed technologies that allow for high data throughput The abundant hands-on exercises in this practical tutorial will lock in these essential skills for any large scale data science project Purchase of the print book includes a free eBook in PDF Kindle and ePub formats from Manning Publications About the technology Programming techniques that work well on laptop sized data can slow to a crawl or fail altogether when applied to massive files or distributed datasets By mastering the powerful map and reduce paradigm along with the Python based tools that support it you can write data centric applications that scale efficiently without requiring codebase rewrites as your requirements change About the book *Mastering Large Datasets with Python* teaches you to write code that can handle datasets of any size You'll start with laptop sized datasets that teach you to parallelize data analysis by breaking large tasks into smaller ones that can run simultaneously You'll then scale those same programs to industrial sized datasets on a cluster of cloud servers With the map and reduce paradigm firmly in place you'll explore tools like Hadoop and PySpark to efficiently process massive distributed datasets speed up decision making with machine learning and simplify your data storage with AWS S3 What's inside An introduction to the map and reduce paradigm Parallelization with the multiprocessing module and pathos framework Hadoop and Spark for distributed computing Running AWS jobs to process large datasets About the reader For Python programmers who need to work faster with more data About the author J T Wolohan is a lead data scientist at Booz Allen Hamilton and a PhD researcher at Indiana University Bloomington
