AI for Absolute Beginners Over 40 : A Complete No-Code Guide to Understanding Artificial Intelligence, ChatGPT, Machine Learning, and Large Language Models for Seniors and Mid-Career Professionals amr bauomy,2026-02-28 Are you over 40 and feeling overwhelmed by the rapid rise of Artificial Intelligence Do terms like ChatGPT Machine Learning and Large Language Models sound like complex technical jargon that's impossible to understand You are not alone Millions of smart experienced adults feel left behind by the AI revolution but that ends today AI for Absolute Beginners Over 40 is the first and only guide written specifically for mature learners who want to understand use and benefit from AI without needing a computer science degree This book respects your intelligence while meeting you exactly where you are What You'll Discover Inside Jargon Free Explanations Finally understand what AI Machine Learning and LLMs really mean using simple analogies you'll never forget The Art of Prompting Master the single most important skill for getting amazing results from ChatGPT Google Gemini and Microsoft Copilot Real World Applications Use AI to write professional emails plan family vacations help grandchildren with homework and organize your thoughts Career Reinvention Revitalize your resume craft a compelling LinkedIn profile and practice job interviews with your own AI coach Personal Enrichment Learn a new language research your family history create stunning AI artwork and plan your dream garden Financial Health Planning Generate budget spreadsheets create meal plans for dietary restrictions and design simple workout routines Privacy Safety Learn exactly how to protect yourself from scams deepfakes and privacy risks no fear just practical knowledge Business Ideas Discover 4 simple side businesses you can start immediately using AI from creating local history tours to offering resume review services Why This Book Is Different No Coding Required Zero programming Zero math Zero technical background needed Large Print Format Easy to read text designed for comfortable reading Step by Step Instructions Every chapter includes practical exercises and clear action steps Written for Your Wisdom This book honors your decades of life experience and shows you how to combine it with AI to become unstoppable The future isn't something that happens to you it's something you create Whether you're looking to advance your career start a side business connect with loved ones or simply satisfy your curiosity this book gives you the tools and confidence to thrive in the age of AI Scroll up and click Buy Now to begin your empowering journey into Artificial Intelligence today

Generating Counterfactual Explanations for Electrocardiography Classification with Native Guide Viktoria Andres,2022-01-14 Bachelor Thesis from the year 2021 in the subject Computer Sciences Artificial Intelligence language English abstract This work focuses on a novel instance based technique called Native Guide that

generates counterfactual explanations for time series data classification It uses nearest neighbour samples from the real data distribution with class change as a foundation This thesis applies the method on the explanation of electrocardiogram ECG classification a very complex and vital medical field where every single ECG carries unique features Native Guide for ECGs is explained examined and expanded by providing necessary background knowledge amplifying aspects like plausibility comparing different suitable models to each other and indicating benefits and downsides Finally counterfactual explanations for ecg data classification generated by Native Guide are evaluated by cardiologists by means of two expert interviews Synchronization of the periodic ECG data was shown to be the most important contribution to the method that enabled the generation of plausible counterfactuals The experts who had never seen or used counterfactuals in their work were interested in this approach and could envision its application within the field when it comes to training junior doctors In general AI classification along with sophisticated proximate counterfactuals indicate success and reliability when it comes to the identification of heart diseases Explanations are essential components in the promising fields of artificial intelligence AI and machine learning Deep learning approaches are rising due to their supremacy in terms of accuracy when trained with huge amounts of data Because of their black box nature the predictions are also hard to comprehend retrace and trust Good explanation techniques can help to understand why a system produces a certain prediction and therefore increase trust in the model Understanding the model is crucial for domains like healthcare where decisions ultimately affect human life Studies have shown that counterfactual explanations in particular tend to be more informative and psychologically effective than other methods

A Guide to Commercial Artificial Intelligence Wendy B. Rauch-Hindin,1988 Rauch Hindin discusses how artificial intelligence AI differs from traditional programs and the strategies and problems of bringing AI into an organization She explains how systems with specialized problem solving expertise work and how to build one using AI application development tools She also covers a number of real world AI applications in industry business and finance science medicine and engineering AI programming languages the different types of computer hardware that can run AI systems and the underlying concepts and potential of state of the art expert systems for automated programming ISBN 0 13 368770 8 pbk 28 95
