

THE 50 COMPANIES WITH THE BEST CUSTOMER SERVICE

METHODOLOGY

Qualtrics XM uses a proprietary methodology to measure customer service performance. The methodology is based on a combination of quantitative and qualitative data. Quantitative data is collected through surveys, while qualitative data is collected through social media monitoring and customer feedback. The methodology is designed to provide a comprehensive view of customer service performance across a wide range of categories and industries.

American Customer Satisfaction Index (ACSI) 2023

The ACSI is a widely recognized benchmark for customer satisfaction. It is based on a survey of over 100 million consumers across 100 different categories. The ACSI score is calculated based on the percentage of consumers who are satisfied with the company's customer service, and the percentage of consumers who are likely to recommend the company to others.

American Customer Satisfaction Index (ACSI) 2022

The ACSI 2022 scores provide a baseline for comparison with the 2023 scores. The scores are generally lower than the 2023 scores, reflecting the challenges faced by companies during the pandemic. The 2023 scores show a significant improvement in customer satisfaction across most categories.

Customer Satisfaction Index (CSI) 2024

The CSI is a proprietary index that measures customer satisfaction based on a different methodology than the ACSI. It is based on a survey of over 100 million consumers across 100 different categories. The CSI score is calculated based on the percentage of consumers who are satisfied with the company's customer service, and the percentage of consumers who are likely to recommend the company to others.
