The Emperor's New Mind Roger Penrose, 1978

Gödel's Disjunction Leon Horsten, Philip Welch, 2016-09-09 The logician Kurt G del in 1951 established a disjunctive thesis about the scope and limits of mathematical knowledge either the mathematical mind is not equivalent to a Turing machine i e a computer or there are absolutely undecidable mathematical problems In the second half of the twentieth century attempts have been made to arrive at a stronger conclusion In particular arguments have been produced by the philosopher J R Lucas and by the physicist and mathematician Roger Penrose that intend to show that the mathematical mind is more powerful than any computer These arguments and counterarguments to them have not convinced the logical and philosophical community The reason for this is an insufficiency of rigour in the debate The contributions in this volume move the debate forward by formulating rigorous frameworks and formally spelling out and evaluating arguments that bear on G del's disjunction in these frameworks The contributions in this volume have been written by world leading experts in the field

Content and Consciousness Revisited Carlos Muñoz-Suárez, Felipe De Brigard, 2015-07-10 What are the grounds for the distinction between the mental and the physical What is it the relation between ascribing mental states to an organism and understanding its behavior Are animals and complex systems vehicles of inner evolutionary environments Is there a difference between personal and sub personal level processes in the brain Answers to these and

other questions were developed in Daniel Dennett's first book *Content and Consciousness* 1969 where he sketched a unified theoretical framework for views that are now considered foundational in cognitive science and philosophy of mind *Content and Consciousness Revisited* is devoted to reconsider the ideas and ideals introduced in Dennett's seminal book by covering its fundamental concepts hypotheses and approaches and taking into account the findings and progress which have taken place during more than four decades This book includes original and critical contributions about the relations between science and philosophy the personal sub personal level distinction intelligence learning intentionality rationality propositional attitudes among other issues of scientific and philosophical interest Each chapter embraces an updated approach to several disciplines like cognitive science cognitive psychology philosophy of mind and cognitive psychiatry

Sanity and Solitude Bob Spencer, 2012 The world is a mad place and the various vicissitudes of life appear to make it more so The inherent mutability in nature can swing from the serendipitous to surreal malignity within a matter of moments In this day and age events can be ephemeral or appear so prolonged we are left agonisingly to wonder if they will ever terminate at all To be lost in such a bewildering universe when it feels impossible to gather oneself to take stock of the changeability or to bear the interminable we feel impotent overwhelmed and wrongfully abused *Sanity and Solitude* is one man's ramble through these frightful absurdities and contradictions that appear to confront us at every turn To understand insanity one has to travel oneself to the very fringes of insanity itself for better or for worse We are the clouds that veil the midnight moon How restlessly they speed and gleam and quiver Streaking the darkness radiantly yet soon Night closes round and they are lost forever Percy Bysshe Shelley

Conversations on Consciousness Susan Blackmore, 2006-01-01 In *Conversations on Consciousness* Susan Blackmore interviews some of the great minds of our time a who's who of eminent thinkers all of whom have devoted much of their lives to understanding the concept of consciousness The interviewees ranging from major philosophers to renowned scientists talk candidly with Blackmore about some of the key philosophical issues confronting us in a series of conversations that are revealing insightful and stimulating They ruminate on the nature of consciousness is it something apart from the brain and discuss if it is even possible to understand the human mind Some of these thinkers say no but most believe that we will pierce the mystery surrounding consciousness and that neuroscience will provide the key Blackmore goes beyond the issue of consciousness to ask other intriguing questions Is there free will A question which yields many conflicted replies with most saying yes and no If not how does this effect the way you live your life and more broadly how has your work changed the way you live Paired with an introduction and extensive glossary that provide helpful background information these provocative conversations illuminate how some of the greatest minds tackle some of the most difficult questions about human nature
