The Story Paradox Jonathan Gottschall, 2021-11-23 Storytelling a tradition that built human civilization may soon destroy it Humans are storytelling animals Stories are what make our societies possible Countless books celebrate their virtues But Jonathan Gottschall an expert on the science of stories argues that there is a dark side to storytelling we can no longer ignore Storytelling the very tradition that built human civilization may be the thing that destroys it In *The Story Paradox* Gottschall explores how a broad consortium of psychologists communications specialists neuroscientists and literary quants are using the scientific method to study how stories affect our brains The results challenge the idea that storytelling is an obvious force for good in human life Yes storytelling can bind groups together but it is also the main force dragging people apart And it s the best method we ve ever devised for manipulating each other by circumventing rational thought Behind all civilization s greatest ills environmental destruction runaway demagogues warfare you will always find the same master factor a mind disordering story Gottschall argues that societies succeed or fail depending on how they manage these tensions And it has only become harder as new technologies that amplify the effects of disinformation campaigns conspiracy theories and fake news make separating fact from fiction nearly impossible With clarity and conviction Gottschall reveals why our biggest asset has become our greatest threat and what if anything can be done It is a call to stop asking How we can change the world through stories and start asking How can we save the world from stories
