Decentralization and Constitutionalism in Africa Charles M. Fombad, Nico Steytler, 2019-09-10 This collection of essays assesses the efforts of African governments to constitutionalise decentralisation be it in the form of federalism local government or traditional authorities Since the end of the Cold War jurisdictions across Africa have witnessed an ostensible return to multi party democracy within the paradigm of constitutionalism and the rule of law Linked to the democratisation process many countries took steps to decentralize power by departing from the heavily centralized systems inherited from colonial regimes The centralization of power typically characterized by the personalization and concentration of power in the hands of leaders and privileged elites in capital cities mostly resulted in repressive regimes and fragile states As decentralisation is a response to these challenges this volume analyses the dynamic relationship between the efforts to implement decentralization and presence or absence of constitutionalism This volume examines a variety of forms and degrees of decentralization found across Africa It advances a new understanding of trends and patterns and facilitates the exchange of ideas among African governments and scholars about the critical role that decentralisation may play in democratization of and constitutionalism in Africa This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations

Counteracting Containment Policies in the EU Jenny Poon, 2025-10-22 This monograph examines an individual's right not to be returned to places where they may be in danger of serious human rights violations termed non refoulement. It argues that EU asylum practices can lead to a failure to observe this important right. As dire consequences can result if individuals are returned to places where they may face death, torture, or other cruel treatment, the European asylum system must comply with non refoulement. However, EU countries use various tactics, including legal measures, to contain asylum claimants and refugees to other countries and to evade their responsibilities to observe non refoulement under international and European law. These containment strategies are demonstrated in two case study examples: the United Kingdom and Germany. In the first example, the United Kingdom returns asylum claimants and refugees back to transit countries where they did not claim asylum. This method of containing asylum claimants and refugees effectively increases the chances of them being indirectly returned to face violations of human rights. In the second example, Germany returns these claimants and refugees through transfer processes back to another EU country by relying solely on guarantees from national governments. This effectively contains the claimants and refugees outside of Germany, again increasing the risks of human rights violations. As violence and conflicts persist, this book contributes to existing literature by providing human rights law analysis with a unique lens of containment.

Platforms in EU VAT Law Christina Pollak, 2022-10-18 Applying the provisions of the European Union Value Added Tax (EU VAT) Directive poses challenges when applied to the digital platform economy. Recent responses to these challenges revolve around the deemed supplier regime introduced by the so-called e-commerce package, and this regime is thus the focus of this indispensable work. The first part provides an in-depth analysis of the regime, its background, and scope, its interpretation, and its application in practice. In its detailed examination of how digital platforms that enable supplies of goods through their interfaces are treated for VAT purposes under EU law, the author elucidates such topics and issues as the following: The qualification of the sale of goods through platforms; supply of the platform service to the underlying supplier; supply of the platform service to the customer; supply of goods from the underlying supplier to the customer; supplies from third countries; the Organisation for Economic Co-operation and Development (OECD) proposal's influence on the interpretation of the EU e-commerce package; chain transactions; determination of the place of supply; chargeable event and chargeability of VAT; taxable amount; applicable rates and exemptions; platform's recordkeeping obligations; accompanying customs measures; return of goods and warranty cases; and future of effective and efficient VAT collection. The author also undertakes a detailed analysis of a potential infringement of the principle of equality, neutrality, and the right to conduct a business. Fully taking into consideration the case law of the CJEU, administrative practice, and the relevant academic literature, the author's research reveals the weaknesses, opportunities, and limits for Member States' implementation of EU VAT law. The upshot is an important work that promises to make the EU VAT system more fraud-resistant, simplify compliance obligations, enforce the principle of neutrality, and reduce distortion of competition. The book

will be of immeasurable value to any practitioner and policymaker approaching any case involving the deemed supplier regime for digital platforms with full awareness of the applicable rules

Microfinance and Financial Inclusion Eugenia Macchiavello, 2017-07-20 Following the recent global financial crisis there is a growing interest in alternative finance and microfinance in particular as new instruments for providing financial services in a socially responsible way or as an alternative to traditional banking Nonetheless correspondingly there is also a lack of clarity about how to regulate alternative financial methods particularly in light of the financial crisis lessons on regulatory failure and shadow banking's risks This book considers microfinance from a legal and regulatory perspective Microfinance is the provision of a wide range of financial services particularly credit but also remittances savings to low income people or financially excluded people It combines a business structure with social inspiration often resorts to technological innovations to lower costs Fintech e.g. crowdfunding and mobile banking and merges with traditional local experiences e.g. financial cooperatives and Islamic finance this further complicating the regulatory picture The book describes some of the unique dimensions of microfinance and the difficulties that this can cause for regulators through a comparative analysis of selected European Union EU countries regimes The focus is in fact on the EU legal framework with some references to certain developing world experiences where relevant The book assesses the impact and validity of current financial regulation principles and rules in light of the most recent developments and trends in financial regulation in the wake of the financial crisis and compares microfinance with traditional banking The book puts forward policy recommendations for regulators and policy makers to help address the challenges and opportunities offered by microfinance
