INTRODUCTION

Financial management "is the operational activity of a business that is responsible for obtaining and effectively utilising the funds necessary for efficient operations".

Financial management is concerned with three key activities namely:

- Anticipating financial needs
- Acquiring financial resources
- Allocating funds in business

Traditional approach to financial management

Traditionally, financial management was considered as a branch of knowledge with focus on the procurement of funds. Instruments of financing, formation, merger and restructuring of firms, legal and institutional frame work involved therein occupied the prime place in this approach.

Modern approach to financial management

Modern phase has shown the commendable development with combination of ideas from economic and statistics that led the financial management more analytical and quantitative. The key work area of this approach is rational matching of funds to their uses, which leads to the maximisation of shareholders' wealth.

TYPES OF FINANCE

Finance is one of the important and integral part of business concerns, hence, it plays a major role in every part of the business activities. It is used in all the area of the activities under the different names.
