Openai Usa:

Unlocking the Potential of OpenAI's ChatGPT DAVID YAO, Have you heard of OpenAI's ChatGPT but have no idea what it is or how to use it? Look no further! This book provides a comprehensive introduction to this revolutionary language model. In this book, the author takes you through the history of ChatGPT and its capabilities, as well as its practical applications in fields such as customer service, content creation, and data analysis. You'll also learn how ChatGPT works and what sets it apart from other language models. But that's not all—the book also provides hands-on examples and tutorials to help you put your newfound knowledge into practice. The author will also address the limitations of the model and provide tips on how to achieve optimal results. Whether you're a data scientist, business owner, or student, this book is a must-read for anyone looking to understand and utilize the power of ChatGPT. With its comprehensive understanding of ChatGPT and its potential to transform the way we work and learn, this book is sure to be a valuable resource. So why wait? Get your hands on a copy today and let OpenAI's ChatGPT work for you.

ChatGPT in Scientific Research and Writing Jie Han, Wei Qiu, Eric Lichtfouse, 2024-09-13 Most scientists are constantly under pressure for reading essential literature, designing new experiments, writing successful proposals and papers, and meeting deadlines. However, imagine that your brain is connected to the entire human knowledge and can extract instantly essential information for discovery. Imagine that research tasks that took days to months can now be done within few seconds. This is not science fiction anymore since the onset of generative artificial intelligence tools such as ChatGPT. This book explains concisely and simply how to use ChatGPT for identifying new results, crafting titles, editing language, interpreting figures, creating visuals, and refining methods. ChatGPT even allows for brainstorming, designing experiments, writing proposals, responding to reviewers, and evaluating research papers. Written for researchers with no background in coding or prompt engineering, this book provides the skills necessary to navigate the changing landscape of scientific research. In particular, you will learn how to leverage ChatGPT's unique capabilities to generate ideas, streamline literature reviews, and craft compelling narratives. In short, this book empowers you to unlock the potential of ChatGPT, boosting productivity and taking your scientific research and writing to new heights.

THEY WANT TO BUILD THE WORLD WITHOUT US Alexander Sugiharto, 2025-12-09 The clock is ticking. 2030 is not a distant date; it is the deadline for civilization as we know it. *The 2030 Reckoning* tears away the polished veneer of innovation to expose the shadowy cabal of global elites and powerful corporations who are weaponizing AI not for progress but for absolute authoritarian control. Technocapitalists: The hyper-wealthy funding the AI revolution, viewing human labor and autonomy as inefficient obstacles to maximum profit. Technofascists: The architects using algorithmic power to design a new rigid social order, a world where every choice is monitored, every dissent is silenced, and every life is managed by a centralized non-human intelligence. **INSIDE THIS EXPLOSIVE INVESTIGATION** Every chapter dissects the catastrophic impact of AI development on a different pillar of civilization, revealing the blueprint for global dominance. Humanity: The fusion of man and

machine and the dark agenda to redefine or replace the human soul Politics The end of democracy as algorithmic governance takes over making human choice irrelevant Economics The final collapse of labor the universal basic income trap and the rise of a cashless fully monitored economy The Military The chilling reality of autonomous weapons and global surveillance nets designed for total submission Religion The machine s replacement for faith purpose and the divine Stop viewing AI as a tool It is the ultimate Trojan Horse delivering total power into the hands of the elite who seek to finalize their vision for a future without free will Your time to understand the conspiracy is running out Read The 2030 Reckoning now and arm yourself with the truth before the future is coded and locked down forever [Artificial Intelligence](#) Arthur G.O. Mutambara,2025-04-09

This book presents contextualised and detailed research on Artificial Intelligence AI and the Global South It examines the key challenges of these emerging and least industrialised countries while proffering holistic and comprehensive solutions The book then explains how AI as part of these broad interventions can drive Global South economies to achieve inclusive development and shared prosperity The book outlines how countries can swiftly prepare to adopt and develop AI across all sectors It presents novel national regional and continental AI adoption development and implementation frameworks Features Broad non AI interventions and prescriptions to address Global South challenges A comprehensive but accessible introduction to AI concepts technology infrastructure systems and innovations such as AlphaFold ChatGPT 4 and DeepSeek R1 An overview of AI related technologies such as quantum computing battery energy storage systems 3D printing nanotechnology IoT and blockchain How to prepare emerging economies to unlock the benefits of AI while mitigating the risks Discussion of specific AI applications in 11 critical Global South sectors Details of 11 sector case studies of AI adoption in the Global South and Global North Ten country case studies Sharing emergent AI experiences in the Global South AI adoption framework vision strategy policy governance legislation regulation and implementation matrix A framework for democratising and decolonising AI The value proposition for AI research development and ownership in the Global South A case for the participation of the Global South in the AI semiconductor industry This book is aimed at policymakers business leaders graduate students academics researchers strategic thinkers and world leaders seeking to understand and leverage the transformative role of AI based systems in achieving inclusive development economic transformation and shared prosperity

Intelligent Systems Rosiane de Freitas,Diego Furtado,2026-03-02 The four volume set LNAI 16179 16182 constitutes the refereed proceedings of the 35th Brazilian Conference on Intelligent Systems BRACIS 2025 held in Fortaleza CE Brazil during September 29 October 2 2025 The 147 full papers included in these volumes were carefully reviewed and selected from 393 submissions They were organized in three key tracks 82 articles in the main track showcasing cutting edge AI methods and solid results 27 articles in the AI for Social Good track featuring innovative applications of AI for societal benefit using established methodologies and 38 articles in other AI applications presenting novel applications using established AI methods naturally considering the ethical aspects of the application [Artificial Intelligence and Large](#)

Language Models Abbas Moallem, Helmut Degen, Stavroula Ntoa, 2026-03-11 With the latest developments in generative artificial intelligence AI and large language model LLM applications like ChatGPT and Gemini millions of people have started using them in their personal and professional lives Interest in them continues to grow and they are becoming the go to applications for students academics engineers lawyers designers writers media experts programmers politicians artists and citizens across the globe However understanding these applications can be technical with precious little advice out there This book cuts through the jargon to explain the what why and how of generative AI and LLM applications This book summarizes experiences from a variety of applications relevant to our daily lives It brings together scientifically grounded experience reports from different perspectives into a one stop title With an international outlook and featuring global case studies it offers insights into the beneficial use of LLMs and generative AI including future trends for how the journey of using such amazing tools will continue in the future This book details the history of AI reviews LLM literature and covers neural computing and the technical foundation of LLMs Furthermore the use and control of LLMs in education are covered Through reading this book the reader will develop a full understanding of AI and LLM applications including knowledge of the key issues of trust legality security and technical foundations Artificial Intelligence and Large Language Models A Scientific Perspective will appeal to students and academics as well as people interested in the use of LLMs and generative AI for professional or everyday tasks including those in Human Factors Human Computer Interaction Computer Science Software Engineering and Industrial Engineering

West to East: A New Global Economy in the Making? Arno J. van Niekerk, 2025-09-19 This book covers new trends in the global economy as a result of geopolitical shifts Given the rise of the East especially China and India and strong Arab economies in the Middle East clear signs are emerging that the axis of power may be shifting from the West America and Europe to the East This shift including any intentions towards de-dollarization plus its implications need to be thoroughly investigated In addition the influence of the digital revolution in finance cryptocurrencies CBDCs FinTech etc are changing the global landscape What also cannot be overlooked are the disruptive effects caused by the new Trump administration in the United States on the global economy A key question is what are the implications of these significant global developments for economic sustainability Are researchers and policymakers seeing a new form of capitalism emerging or is it new socialism Achieving the Sustainable Development Goals SDGs remain a high priority to most countries around the world but the progress of many has been derailed by the COVID 19 pandemic If economic inclusion as part of the SDGs remains a central objective these latest developments will have a significant impact on it going forward especially in view of growing geopolitical tension The role of global economic institutions will be crucial in furthering globalization or preventing de-globalization A higher level of international collaboration especially from an inclusive economic perspective will be needed to steer the global economy in a direction that will result in genuine economic progress for all Addressing all these aspects the book specifically includes the following special features comparative trends

graphs and tables of the geopolitical and geoeconomic shifts over the past few decades illustrations of changes in the financial system new analyses of traditional economic theories e g capitalism and socialism criteria for an inclusive economy and how they help to attain the SDGs new dissections of the digital revolution in the context of the geopolitical shifts and proposals on how to deal with the challenges from a global economic governance perspective Sustainable economic progress is paramount but the challenge of balancing global priorities geopolitical forces and inclusive innovation requires comprehensive investigation In a world where power is fluctuating technologies are transforming the economy and global norms are being rewritten this book offers timely insights into how inclusive and sustainable economic futures can still be imagined and realized

Deploying Artificial Intelligence to Achieve the UN Sustainable Development Goals Arthur Guseni Oliver Mutambara,2025-07-01 This book provides research insights into how Artificial Intelligence AI can be used to achieve the UN s Sustainable Development Goals SDGs 17 interconnected goals designed to address the world s most pressing challenges by 2030 It reviews the SDGs and discusses why progress has been mixed and uneven across different countries regions and goals The book posits that attaining the SDGs will depend on enhanced global cooperation increased funding improved infrastructure public private partnerships regional continental integration addressing the climate crisis inclusive economic transformation and visionary leadership More specifically the publication advocates leveraging innovative and transformative technologies particularly the deployment of AI The research acknowledges the risks of digital imperialism data colonialism and technological exclusion especially in emerging and least industrialised economies Hence in deploying AI to achieve the SDGs the book puts a premium on decoloniality in AI systems and democratising AI technology Provides a critique of the current SDGs approach by reframing the goals as a comprehensive risk assessment of humanity s most pressing threats in the 21st century Features broad and holistic interventions to accelerate the attainment of the SDGs Provides a comprehensive but accessible introduction to AI concepts and advanced innovations such as AlphaFold ChatGPT 4 DeepSeek R1 Grok 3 and autonomous vehicles drones and driverless cars Discusses the AI strategies of leading economies and assesses the impact of AI on geopolitics Provides a comprehensive critique of global AI efforts by the UN and African Union while proffering alternative paradigms and frameworks Presents the enablers drivers and strategic framework of AI deployment to achieve the SDGs Develops and presents details of six distinct but related components of a novel Strategic Framework for developing and adopting AI Vision Strategy Policy Governance Legislation Regulations and Implementation Matrix Outlines specific ways that AI can be deployed to achieve each of the 17 SDGs and reviews seven countries experiences Explores an innovative forward looking and technology driven framework for equitable global socio economic transformation to succeed the SDGs post 2030

Foundations of Deep Reinforcement Learning Laura Graesser,Wah Loon Keng,2019-11-20 The Contemporary Introduction to Deep Reinforcement Learning that Combines Theory and Practice Deep reinforcement learning deep RL combines deep learning and reinforcement learning in which artificial agents learn to

solve sequential decision making problems In the past decade deep RL has achieved remarkable results on a range of problems from single and multiplayer games such as Go Atari games and DotA 2 to robotics Foundations of Deep Reinforcement Learning is an introduction to deep RL that uniquely combines both theory and implementation It starts with intuition then carefully explains the theory of deep RL algorithms discusses implementations in its companion software library SLM Lab and finishes with the practical details of getting deep RL to work This guide is ideal for both computer science students and software engineers who are familiar with basic machine learning concepts and have a working understanding of Python Understand each key aspect of a deep RL problem Explore policy and value based algorithms including REINFORCE SARSA DQN Double DQN and Prioritized Experience Replay PER Delve into combined algorithms including Actor Critic and Proximal Policy Optimization PPO Understand how algorithms can be parallelized synchronously and asynchronously Run algorithms in SLM Lab and learn the practical implementation details for getting deep RL to work Explore algorithm benchmark results with tuned hyperparameters Understand how deep RL environments are designed Register your book for convenient access to downloads updates and or corrections as they become available See inside book for details

Four Battlegrounds Paul Scharre,2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club s Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of Burn In An award winning defense expert tells the story of today s great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre s account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China s National Team of leading AI companies to show the chilling synergy between China s government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to

autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order

Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
