Empire of AI Karen Hao, 2025-05-20. A New York Times Notable Book Finalist for the National Book Critics Circle Award. An Instant New York Times Bestseller. Named a Best Book of the Year by Smithsonian, Scientific American and Elle. A bestselling page turner that has made waves not just in Silicon Valley but around the world. With *Empire of AI*, Hao is fundamentally shaping many people's perceptions and understanding of the company at the center of the AI revolution. TIME Magazine, TIME100 AI 2025. Excellent and deeply reported. Tim Wu, The New York Times. Startling and intensely researched, an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us. Vulture. From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning, an eye-opening account of arguably the most fateful tech arms race in history, reshaping the planet in real time from the cockpit of the company that is driving the frenzy. When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019, she thought they were the good guys. Founded as a nonprofit with safety enshrined as its core mission, the organization was meant its leader, Sam Altman, told us to act as a check against more purely mercantile and potentially dangerous forces. What could go wrong? Over time, Hao began to wrestle ever more deeply with that question. Increasingly, she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources: the compute power of high-end chips and the processing capacity to create massive large language models, the sheer volume of data that needs to be amassed at scale, the humans cleaning up that data for sweatshop wages throughout the Global South, and a truly alarming spike in the usage of energy and water underlying it all. The truth is that we have entered a new and ominous age of empire, only a small handful

of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

The Billboard, 1929 **The World's Work**, 1910 **No Prize for Pessimism** Sam Schillace, 2026-03-24

No Prize for Pessimism by Sam Schillace is a thoughtful meditation on the importance of optimism in building and designing tech products or any product for that matter. Schillace is Microsoft's Deputy Chief Technology Officer. He is the co-inventor of Google Docs, a product used by more than a billion people around the world. Through a series of insightful letters and reflections, Schillace shares his journey from the early days of personal computing to the forefront of AI innovation. This book delves into the mindset required for disruption and innovation, emphasizing the importance of optimism, experimentation, and a willingness to embrace the messiness of creation. In his debut as an author, Schillace argues that optimism is crucial for innovation, contrasting it with the dangers of a pessimistic mindset, which he believes stifles creativity and progress. Leadership, according to Schillace, is rooted in humility and trust. He warns against the prima donna death spiral where leaders fail to delegate, leading to team inefficiency. The author discusses the transformative potential of AI, emphasizing the need to integrate AI capabilities with traditional coding practices for effective product development. He explores the balance between speed and maintainability in coding, advocating for a pragmatic approach to software development. Schillace stresses the importance of humility in leadership, encouraging leaders to support their teams and prioritize collective success over personal ego. He identifies several emerging technologies with disruptive potential, including AI, quantum computing, and renewable energy solutions. Throughout the book, the author encourages readers to adopt a "What if" mindset, fostering creativity and resilience in the face of challenges. Schillace shares personal anecdotes and lessons learned throughout his career, offering practical advice for aspiring innovators and leaders. *No Prize for Pessimism* is perfect for entrepreneurs, engineers, and anyone interested in the future of technology.
