Signal App Dr. Timothy Zahar, 2021-01-17 How do you feel How do you feel when Twitter Facebook Snapchat turn off the US President Donald Trump s account permanently I understand that some of you are supportive some are not interested and the rest many people feel outraged and angry What are they doing with the President of the United States The man who truly kept his promise Make America great again We resent not only because that is how to behave in the style of imposing gagging It is because that act seriously violates the freedom we worship in the West And that is the reason why social networks exist But they broke their promise patted themselves on the face They have exceeded their own limits They engage in politics expressing their likes and dislikes not in a neutral position The behavior of social media platforms must comply with the laws and legal frameworks set by the legislators not the political views of the company executives Obviously when these tech giants shake hands together they will manipulate everything and we will be manipulated It was Facebook and Twitter that controlled navigated and manipulated the news surrounding the 2020 US presidential election All the above shares each of us see existence before our eyes But what s behind all of the above Why did those big techs do that The answer is Rights To Private Personal Information On Internet We are being watched every moment We have been violated personal privacy when participating in platforms Facebook Twitter They have collected the maximum of all the data about us Sometimes I still tell my friends Facebook knows you better than you do So is there a way for us to escape their influence and manipulation Yes We have 2 options Or not join any social networking platform This is difficult today because our work is tied to social connections Or we choose a social networking platform that is committed to respecting our privacy And don t just end up with commitments they need to give us the tools to proactively establish their own security And luckily for you and me there are platforms now that meet these criteria That is Singal A security proven messaging app by tech giants like Elon Musk Or even the CEO of Twitter Jack Dorsey also publicly uses and encourages people to use Signal What do you learn more from reading this book 1 I will show you 7 powerful reasons why you should immediately quit WhatsApp Facebook Messenger and switch to Signal immediately And not only that you will also encourage your friends and colleagues to do the same I commit to this 2 I will show you how to install Signal and set up the perfect features to help you keep your personal information secure on the Internet So that we will not be under surveillance control and navigate I will write about personal security on the Internet in the simplest most popular way that a 7 year old can understand and share with everyone Now let us get started the journey of finding real freedom on social media platforms Dr Timothy Zahar

Digital Storytelling on Snapchat Julia Grobb, 2022 As journalism increasingly shifts to the digital space social media apps like Snapchat Instagram or Facebook are offering new potentials to present news Exciting and lively

storytelling is particularly in demand to capture the recipient's interest and immerse them into the story. With its specific features, Snapchat Discover provides a suitable platform for digital storytelling. Using a qualitative content analysis, the news stories of two German and two U.S. media outlets on Snapchat were examined over a period of three months, considering both long-established as well as new formats produced exclusively for Snapchat. The results show that the media outlets examined each take their own unique storytelling approaches on Snapchat. They range from intensive storytelling to short breaking news or even infotainment. The media outlets rely on both traditional storytelling methods and new multimedia opportunities for their news. However, it turns out that the newer formats on Snapchat are somewhat more experimental and exploit the possibilities of the platform more than the long-established ones.
