American Literature and American Identity Patrick Colm Hogan, 2021-11-10 In recent years cognitive and affective science have become increasingly important for interpretation and explanation in the social sciences and humanities However little of this work has addressed American literature and virtually none has treated national identity formation in influential works since the Civil War In this book Hogan develops his earlier cognitive and affective analyses of national identity further exploring the ways in which such identity is integrated with cross culturally recurring patterns in story structure Hogan examines how authors imagined American identity understood as universal democratic egalitarianism in the face of the nation's clear and often brutal inequalities of race sex and sexuality exploring the complex and often ambivalent treatment of American identity in works by Charlotte Perkins Gilman Eugene O'Neill Lillian Hellman Djuna Barnes Amiri Baraka Margaret Atwood N Scott Momaday Spike Lee Leslie Marmon Silko Tony Kushner and Heidi Schreck

AIDS and Representation Fiona Johnstone, 2023-05-18 AIDS Representation explores portraits and self-portraits made in response to the AIDS epidemic in America in the 1980s and 1990s Addressing the work of artists including Mark Morrisroe Robert Blanchon and Felix Gonzalez Torres through the interrelated themes of sickness and mortality desire and sexual identity love and loss Fiona Johnstone shows how the self-representational practices of artists with HIV and AIDS offered a richly imaginative response to the limitations of early AIDS imagery Johnstone argues that the AIDS epidemic changed the very nature of visual representation and artistic practice necessitating a radical new approach to conceptualising and visualising the human form An extended epilogue considers the ongoing art historicization of the epidemic re-contextualising the book's themes in relation to contemporary photographic works More than just a historical discussion of the art of the AIDS crisis AIDS and Representation contributes to an emergent body of scholarship on the visual representation of illness Expanding the established genre of the autopathography or illness narrative beyond the predominantly textual this important contribution to art history and health humanities sensitively unpicks the entanglements between aesthetic form and the expression of lived experiences of critical and chronic ill health

Organized Crime Klaus von Lampe, 2015-07-16 2016 Outstanding Publication Award The International Association for
 the Study of Organized Crime Organized Crime Analyzing Illegal Activities Criminal Structures and Extra legal Governance
 provides a systematic overview of the processes and structures commonly labeled organized crime drawing on the pertinent
 empirical and theoretical literature primarily from North America Europe and Australia The main emphasis is placed on a
 comprehensive classificatory scheme that highlights underlying patterns and dynamics rather than particular historical
 manifestations of organized crime Esteemed author Klaus von Lampe strategically breaks the book down into three key
 dimensions 1 illegal activities 2 patterns of interpersonal relations that are directly or indirectly supporting these illegal
 activities and 3 overarching illegal power structures that regulate and control these illegal activities and also extend their
 influence into the legal spheres of society Within this framework numerous case studies and topical issues from a variety of
 countries illustrate meaningful application of the conceptual and theoretical discussion **Angels in America** Tony
