## **Hulu Price Customer Service:**

**FCC Record** United States. Federal Communications Commission,2017      **Global Meets Digital** Vinod Jain,2023-06-02

The world today is at the intersection of two megatrends Globalization and Digitalization a business revolution unfolding in real time Global Meets Digital captures the many nuances of this revolution succinctly including its impact on our lives and business An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years such as diminishing returns to scale and resource scarcity are no longer valid for a large and growing number of products and services The book will challenge you to think differently not just about digital products but also about physical products In the global digital world products are of three kinds physical digital and smart machines products that are both physical and digital and connected to the internet a distinction missed by most books on strategy and global business The economics of each kind of products is distinct from that of the others which has strategic implications for all kinds of businesses implications such as how to compete and how to create and capture value With several mini case studies and over 100 company examples the book covers themes and cutting edge issues like the paradox of globalization digital disruption disruptive business models exponential technologies Internet of Things competition in digital markets winner take all market dynamics Industry 4 0 how to innovate strategizing for the New Normal and value creation and value capture in both B2C and B2B contexts The book derives its underpinnings from the practice of global and digital business while theory remains in the background Intended specifically for an executive professional audience Global Meets Digital should also be of value to business students and professors learning to dip their toes into a digital world Vinod Jain is an expert in global and digital strategy award winning professor Fulbright Scholar and author of an MBA textbook Global Strategy He taught at the Rutgers Business School Newark and New Brunswick and the Robert H Smith School of Business University of Maryland College Park At Maryland he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School s Executive MBA program in China Since leaving Maryland he has taught in China Denmark Finland Poland and India as a visiting or term professor His opinion pieces have appeared in The Washington Post The Baltimore Sun Mensa Bulletin and Economic Times and Mint India s 1 and 2 business dailies among other media In the past he worked as a middle and senior level executive with American and British multinationals Vinod has a PhD in Strategy and International Business from the University of Maryland College Park MS in Management from UCLA and MS and BS Hons in Statistics from the Indian Statistical Institute Calcutta      **XaaS:**

**Everything-as-a-service - The Lean And Agile Approach To Business Growth** Shantanu Bhattacharya,Lipika Bhattacharya,2021-10-13 XaaS Everything as a Service The Lean and Agile Approach to Business Growth takes the reader into the bold new world of pay per use for a product or service From the perspective of the customer the servitization model yields multiple benefits the consumer can try out the product service at a relatively low cost the risk is mitigated capital

expenses can be converted into operating expenses it is not needed to forecast how often the product service is used and only parts of the product service needed can be used Similarly a provider can benefit by having a larger market coverage steadier stream of revenues upgrades as and when needed sharing of fixed assets across consumers practicing of value based pricing and unbundling or bundling utility for consumers using appropriate pricing techniques However this nanoization of products services is tricky and has to be designed carefully This book provides a set of recipes to providers to adopt the XaaS model by changing the provider s mindset dividing the product service forces the provider to take a value driven approach to his product service and consequently eliminate all non value added activities The requirements of the XaaS model serve both as an objective to the innovation and internal processes of the provider and as guide to understanding the customer s needs The book also covers data acquisition data analysis and synthesis and data application needs of the XaaS model with simple examples and case studies from the business world of firms that achieve these objectives successfully

**HOLD** Amas Tenumah,2026-02-14 LET ME TALK TO A HUMAN We ve all shouted it Whispered it Thought it while rage pressing zero In HOLD THE SUFFERING ECONOMY OF CUSTOMER SERVICE Amas Tenumah delivers a searing indictment of how modern service was designed not to help you but to wear you down This isn t a how to It s a how dare you Tenumah draws from years inside the belly of the corporate beast where service is measured in KPIs customers are problems to be deflected and automation is the holy grail so long as it keeps complaints quiet and costs lower He connects the dots between corporate incentives AI illusions and the slow erosion of human connection You ll learn Why wait times are a feature not a flaw How cost cutting masquerades as innovation What companies really mean by world class service And why the future of service depends on a revolt led by us Blending real stories biting wit and an operator s insider knowledge HOLD is a rallying cry for anyone who s tired of being treated like an afterthought and ready to demand something better Modern service is working Just not for you

**Artificial Intelligence for Students** Vibha Pandey,2023-03-27 A multifaceted approach to develop an understanding of AI and its potential applications KEY FEATURES AI informed focuses on AI foundation applications and methodologies AI inquired focuses on computational thinking and bias awareness AI innovate focuses on creative and critical thinking and the Capstone project DESCRIPTION AI is a discipline in Computer Science that focuses on developing intelligent machines machines that can learn and then teach themselves If you are interested in AI this book can definitely help you prepare for future careers in AI and related fields The book is aligned with the CBSE course which focuses on developing employability and vocational competencies of students in skill subjects The book is an introduction to the basics of AI It is divided into three parts AI informed AI inquired and AI innovate It will help you understand AI s implications on society and the world You will also develop a deeper understanding of how it works and how it can be used to solve complex real world problems Additionally the book will also focus on important skills such as problem scoping goal setting data analysis and visualization which are essential for success in AI projects Lastly you will learn how decision trees neural
