**Successful K-12 STEM Education**  
National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Board on Science Education, Committee on Highly Successful Schools or Programs for K-12 STEM Education, 2011-07-22 Science technology engineering and mathematics STEM are cultural achievements that reflect our humanity power our economy and constitute fundamental aspects of our lives as citizens consumers parents and members of the workforce Providing all students with access to quality education in the STEM disciplines is important to our nation s competitiveness However it is challenging to identify the most successful schools and approaches in the STEM disciplines because success is defined in many ways and can occur in many different types of schools and settings In addition it is difficult to determine whether the success of a school s students is caused by actions the school takes or simply related to the population of students in the school Successful K 12 STEM Education defines a framework for understanding success in K 12 STEM education The book focuses its analysis on the science and mathematics parts of STEM and outlines criteria for identifying effective STEM schools and programs Because a school s success should be defined by and measured relative to its goals the book identifies three important goals that share certain elements including learning STEM content and practices developing positive dispositions toward STEM and preparing students to be lifelong learners A successful STEM program would increase the number of students who ultimately pursue advanced degrees and careers in STEM fields enhance the STEM capable workforce and boost STEM literacy for all students It is also critical to broaden the participation of women and minorities in STEM fields Successful K 12 STEM Education examines the vast landscape of K 12 STEM education by considering different school models highlighting research on effective STEM education practices and identifying some conditions that promote and limit school and student level success in STEM The book also looks at where further work is needed to develop appropriate data sources The book will serve as a guide to policy makers decision makers at the school and district levels local state and federal government agencies curriculum developers educators and parent and education advocacy groups

*One Nation Under Taught* Vince M. Bertram, 2014-11-18 Encourage students to fall in love with learning again by giving them the tools they need to succeed America has been steadily sliding in global education rankings for decades In particular our students are increasingly unable to compete globally in STEM science technology engineering and math fields According to the National Assessment of Education Progress NAEP in 2010 only 26 percent of high school seniors in the U S scored at or above proficient level in math Another 36 percent were failing Only 3 percent scored at an advanced level in math and only 1 percent scored at an advanced level in science The reason for this decline These subjects are often poorly presented or badly taught leading to students K 12 struggling to connect with the content *One Nation Under Taught* offers a clear solution

providing a blueprint for helping students thrive in STEM subjects and giving them the tools needed to succeed and go on for further study in these fields The book challenges our whole way of thinking about education and encourages educators and policy makers at all levels to work together to make our schools places that promote curiosity and inspire a love of learning If we do not change course we will set our students and our country on the path to a lifetime of poverty But if we can implement the reforms Dr Bertram suggests we can achieve long lasting prosperity for our children and our nation as a whole
