### ALL ABOUT CHATGPT

Over the past years, there have been things like robots and artificial intelligence in our daily lives. AI programs, such as Siri, can perform many different functions, but these programs are based on modern technology in general.

ChatGPT was created by OpenAI, which means that it has been programmed. After its launch, it got very popular and has become one of the most used AI programs.

You can use ChatGPT to help you with different topics or to generate text, such as grammar, summaries, and more.

Now that ChatGPT is so popular, many people are trying to use it to help them with their schoolwork.

### ALL ABOUT CHATGPT

Technology is important, and artificial intelligence (AI) is a big part of our lives. ChatGPT is an example of an AI program that can do many things. There are a lot of questions on what progress we can expect in the future.

ChatGPT is a computer program that can write texts, do maths and answer questions. It's cool and clever. For example, it can make text sound more professional, check for spelling mistakes or even help you with your homework.

It is very impressive, but there are some problems. The program can sometimes give wrong answers or miss important details. This is why you should not believe everything that the program says.

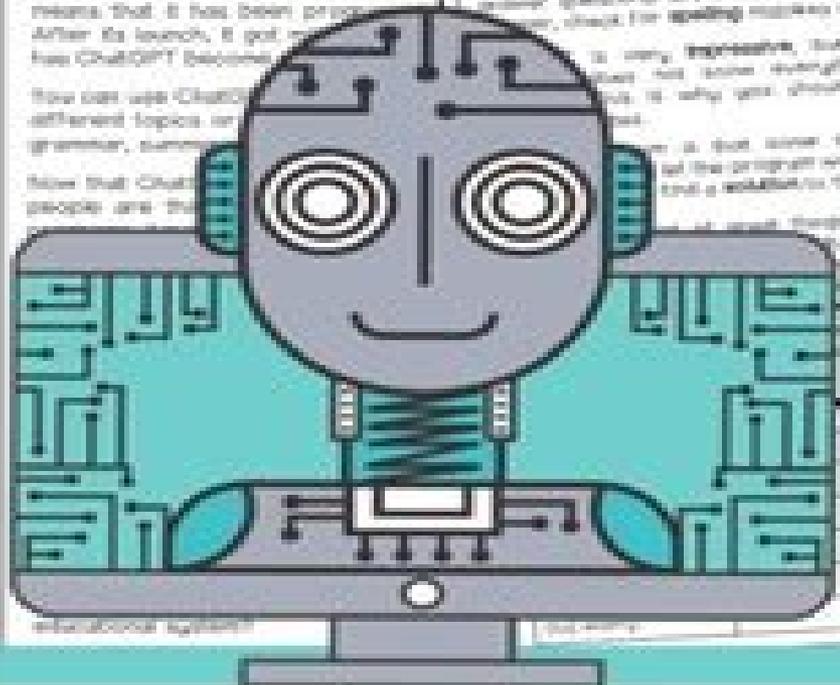

It is important to remember that while some students use ChatGPT to do their homework, the program will not be able to write texts or do their maths exercises for them. It is a tool to help you, not a substitute for your own work.

### CHATGPT - ANSWER SHEET

Name:	Class:
Correct meaning:	
Does that something is true?	
Is it a problem?	
Does that can do things like humans?	
Are there any problems?	
Writing a question or answer?
