and as in previous books there are special issues in ranked journals This symposium is organized by the SMAC Team of the CRISAL Lab of the University of Lille We would like to thank all the contributing authors and the members of the Program Committee for their hard and highly valuable work

**Building Creative Machines: Understanding and Mastering the Possibilities of Generative AI** Gonçalo Perdigão ,Filipa Matos Baptista ,João Santos Pereira, This groundbreaking work explores the dynamic intersection of artificial intelligence creativity and innovation unveiling how Generative AI whether in personal projects or large scale enterprises can be designed to collaborate and enhance human ingenuity It is written for C level executives leaders marketers and creative and curious minds With over two decades of experience Gon alo Perdig o Filipa Matos Baptista MBA PhD and Jo o Santos Pereira PhD spanning corporate leadership start ups and academic research bring together actionable insights cutting edge developments and lessons shared on the community These diverse perspectives and hands on approaches give unique insights into how generative AI reshapes the future of organizations Building Creative Machines community <https://www.buildingcreativemachines.com> offers 100 articles 200 open source sketches Exclusive interviews with leaders from Anthropic Amazon Harvard Google TikTok and more Building Creative Machines is a comprehensive guide for anyone eager to navigate the future of Generative AI driven creativity and unlock its transformative potential

Proceedings of the 5th International Conference on AI Research Renata Paola Dameri, The International Conference on AI Research ICAIR is becoming a key forum for academics and students whether social scientists natural scientists or philosophers come together to explore the future of society in the context of AI Many aspects of AI are now the subject of peer reviewed academic research including the increasing use of Chatbots and GenAI in academe and in society at large The conference was initially launched in 2019 as the European Conference on Artificial Intelligence and Robotics After a success inaugural event in Oxford the conference fell victim to Covid and the following three years were held online Time was taken in 2023 to refocus this fast developing area of research and the name of the conference was changed this year to the International Conference on Artificial Intelligence The Proceedings of the 2025 edition of the conference include academic research papers PhD research papers Masters Research papers and work in progress papers all of which have been presented and discussed at the ICAIR 2025 conference The proceedings are of an academic level appropriate to a professional research audience including graduates postgraduations doctoral and post doctoral researchers All papers have been double blind peer reviewed by members of the Review Committee

**The Rise of Generative AI. Applications, Challenges, and Ethical Implications** Fatlind Mazreku,2025-12-10 Scientific Study from the year 2025 in the subject Computer Sciences Artificial Intelligence language English abstract Generative Artificial Intelligence AI refers to algorithms and models capable of producing new content such as text images music or code that mimics or even rivals human creations Recent breakthroughs in model architectures e g transformers and the advent of large scale models like OpenAI s GPT 3 and DALL E have fueled an explosive growth in generative AI s capabilities and public adoption This paper

provides an overview of generative AI's rise and its transformative impact across various fields. We discuss key applications of generative AI in domains ranging from art and design to software development and medicine, highlighting the innovative benefits it brings, such as enhanced creative productivity and new problem-solving tools. At the same time, we examine the challenges and ethical concerns emerging from generative AI's widespread use, including issues of bias, misinformation, intellectual property, and misuse that have become increasingly urgent. We also analyze the current technical limitations of generative AI, including accuracy, interpretability, and resource demands, and consider future outlooks for the technology. The findings underscore that while generative AI offers unprecedented opportunities and innovations, careful consideration of its ethical implications and proactive governance is essential to ensure it is developed and used responsibly. In conclusion, generative AI stands as a powerful tool that is reshaping creativity, industry, and society, and its continued evolution will depend on balancing its benefits with diligent management of its risks.
