100 SOA Questions Kerrie Holley, Ali Arsanjani, 2011 *100 SOA Questions: Asked and Answered* Kerrie Holley, 2011
100 SOA Questions brings together authoritative answers to the most crucial questions business technical and architectural decision makers ask about SOA. It draws on the immense experience of two SOA experts who've participated in more than 100 SOA projects in the roles of architect, designer, consultant, technical manager, and strategist. Organized to reflect the Open Group's Open Services Integration Maturity Model (OSIMM), this book provides fast, convenient access to information about all facets of SOA: planning, implementation, management, and utilization. This book will be an invaluable resource for all executives, architects, and practitioners who have just started their SOA journey or are well underway. In-depth answers to questions about SOA topics such as SOA Concepts and Planning, Business Strategy, Organization and Support, Governance, Methods and Techniques, Applications, Architecture, Information Management, Infrastructure, and The Future of SOA. 100 SOA Questions answers the most critical questions executives and practitioners have about SOA. Kerrie Holley and Dr. Ali Arsanjani draw on their unsurpassed experience from hundreds of SOA projects conducted worldwide. Why should business stakeholders care about SOA? What is the return on investment (ROI) of SOA adoption? What is flexibility, and how does SOA deliver on this promise? Should service development be centralized in service centers? How should services be identified or specified to maximize reuse? How do SOA methods reduce the lifetime costs for applications? How can organizational barriers to SOA success be removed? What changes with application development when SOA is introduced? How does architecture change as a result of SOA adoption? What is a canonical message model? How does the SOA infrastructure support events? What are context-aware services?

Perspectives in Business Informatics Research Václav Řepa, Tomáš Bruckner, 2016-09-07. This book constitutes the proceedings of the 15th International Conference on Perspectives in Business Informatics Research (BIR 2016) held in Prague, Czech Republic, in September 2016. Overall, 61 submissions from 16 countries were rigorously reviewed by 42 members of the program committee representing 21 countries. The selected 21 full papers and 3 short papers are included in this volume, together with 2 abstracts of invited talks. This year, again, the papers presented at the conference cover many important aspects of the development, use, and application of management information systems. The papers have been organized in topical sections on Business Processes and Enterprise Modeling, Information Systems Development, Information Systems Management, Learning and Capability, and Data Analysis.

Is Conflict Adaptation an Illusion? James R Schmidt, Wim Notebaert, Eva Van Den Bussche, 2015-05-20 Conflict adaptation theory is one of the most popular theories in cognitive psychology The theory argues that participants strategically modulate attention away from distracting stimulus features in response to conflict Although results with proportion congruent sequential congruency and similar paradigms seem consistent with the conflict adaptation view some researchers have expressed scepticism The paradigms used in the study of conflict adaptation require the manipulation of stimulus frequencies sequential dependencies time on task regularities and various other task regularities that introduce the potential for learning

of conflict unrelated information This results in the unintentional confounding of measures of conflict adaptation with simpler learning and memory biases There are also alternative accounts which propose that attentional adaptation does occur but via different mechanisms such as valence expectancy or effort A significant and often heated debate remains surrounding the question of whether conflict adaptation exists independent of these alternative mechanisms of action The aim of this Research Topic is to provide a forum for current directions in this area considering perspectives from all sides of the debate
