## **100 Years Of Architectural Drawing 1900 2000:**

100 Years of Architectural Drawing Neil Bingham, 2013-10-08 This beautiful book brings together 300 of the best architectural drawings from the last century by the world's most prestigious architects creating both a history of the genre and a survey of twentieth century architecture The book is divided into five chronological sections that are prefaced by short essays that highlight the trends and styles of that period Each drawing is captioned with key information about the architect the project and the drawing This dazzling visual feast will appeal to all students and practitioners of architecture as well as anyone with an interest in the subject

**Drawing for Architects** Julia McMorrough, 2015-04 Drawing for Architects provides insights into a progression of drawing types projections and techniques By amplifying the conversations among plan section elevation axonometric oblique and perspective this book explains both the technical and disciplinary importance of these conventions of drawing and the ways they continue to underwrite and enable the efforts of architectural design Back cover

ARCHINESIA 5 Imelda Akmal ( Editor in Chief ), GOOD DESIGN IN ARCHITECTURE NOW One of the most important quite dominant processes in architecture is design process and the goal of architecture design is to obtain good design Good design has double meaning aesthetic and ethic In architecture the two should be united as a single goal that a design process should strive for Moreover an architectural product does not only effect its client and architect On a broader level architectural products also effect their surrounding environments In a large scale they may even have an effect on the economy and the social and political condition The question is How does an architectural design attain the label good design We tried to find the answer through a round table discussion by inviting the two groups of professionals in Indonesia practitioners and academics What are their thought on this matter You can peruse them in the main coverage of Archinesia vol 5 Built Project in Southeast Asia House in Semarang Revano Satria Serenity House phuket Duangrit Bunnag Spiral House Surabaya Archimetric B House Bali d associates Recycled Wood House Jakarta Mamostudio 1 The Mori Bandung LABO Ize Hotel Bali Studio Tonton River Safari Singapore DP Architects Anjung Salihara Studiodasar Audi Centre Singapore Ong Ong Kineforum Misbar Jakarta Csutoras Liando Architravel special Scottish Parliament Building by Enric Miralles

*The Evolution of Airport Design* Robert Stewart, 2024-05-13 This is the first book to comprehensively cover the evolution of airport design from the start of commercial aviation in 1919 to the present day Many books have been written about airport design at a particular moment in history but none have rigorously considered why where when and how the ideas we now take for granted originated This book traces the history of airport design considering the philosophies adopted by designers the functional layouts they have developed and the resultant form of the airport through a series of 40 case studies divided into 7 eras of approximately 20 years each The themes include The philosophies underpinning airport design The evolution of design responses How airports have avoided obsolescence Identification of the key turning points The evolution of master plans and terminal concepts in response to increasing traffic volumes The future of airports in terms of environmental

sustainability and the Covid 19 hiatus The case studies are international covering the USA Germany the UK France the Netherlands Singapore Saudi Arabia Japan Hong Kong Malaysia South Korea Thailand Spain United Arab Emirates China Turkey Mexico Australia and Poland They are illustrated with full colour many of which have not been published before and form part of an incredible graphic package This book is essential reading for architects engineers planners and environmentalists alike

*Drawing on Architecture* Jordan Kauffman,2019-03-19 How architectural drawings emerged as aesthetic objects promoted by a network of galleries collectors and institutions and how this changed the understanding of architecture Prior to the 1970s buildings were commonly understood to be the goal of architectural practice architectural drawings were seen simply as a means to an end But just as the boundaries of architecture itself were shifting at the end of the twentieth century the perception of architectural drawings was also shifting they began to be seen as autonomous objects outside the process of building In *Drawing on Architecture* Jordan Kauffman offers an account of how architectural drawings promoted by a network of galleries and collectors exhibitions and events emerged as aesthetic objects and ultimately attained status as important cultural and historical artifacts and how this was both emblematic of changes in architecture and a catalyst for these changes Kauffman traces moments of critical importance to the evolution of the perception of architectural drawings beginning with exhibitions that featured architectural drawings displayed in ways that did not elucidate buildings but treated them as meaningful objects in their own right When architectural drawings were seen as having intrinsic value they became collectible and Kauffman chronicles early collectors galleries and sales He discusses three key exhibitions at the Leo Castelli Gallery in New York other galleries around the world that specialized in architectural drawings the founding of architecture museums that understood and collected drawings as important cultural and historical artifacts and the effect of the new significance of architectural drawings on architecture and architectural history *Drawing on* interviews with more than forty people directly involved with the events described and on extensive archival research Kauffman shows how architectural drawings became the driving force in architectural debate in an era of change

*Event-Cities 5* Bernard Tschumi,2024-11-12 An essential resource on the work of Bernard Tschumi Architects with a focus on how concept context and program intersect with intuition in singular and unexpected ways *Event Cities 5* is the fifth and final volume in the MIT Press series documenting recent built and unbuilt projects by renowned architect Bernard Tschumi This volume expands on the theoretical preoccupations that have shaped Tschumi's work in practice and pedagogy In this volume Tschumi embarks on what he calls a poetics that addresses both the rational elaboration of work and the

irrational eruption of inexplicable elements in architectural projects How do chance intuition and analogy among other elements intersect with the logical play of concept context and program to generate innovative and informed design Highlights of this volume include circular building projects works with suspended gardens and floating rectangular masses superposed structures created via surrealist tactics an immense educational research complex in France that hovers between building and urban design a museum in China made from intersecting conic shapes and a project for a cultural center in Italy that is structured as an investigation into courtyards and facades The book features nearly 30 projects developed over the last fifteen years and highlights Tschumi s longstanding interest not only in producing conceptual clarity but in questioning architecture itself
