E-Cubed Concept Revisited

In my inaugural editorial of the *Journal of Sustainable Energy Engineering (JSEE)* in 2014, I introduced the “E-cubed” concept. This highlights the significance of the need for paying attention to Energy, Environment and Economy simultaneously, in connection with energy sustainability. Since then, we have published many basic research and application papers in all of these areas. To ensure depth of coverage, we also introduced special issues of the Journal, focusing on a particular topic at least once a year. In addition, we are maintaining the breadth of E-Cubed coverage. We explore the interactions among the three pillars of energy sustainability. We are also giving higher priority to articles that deal with the intersections among the components of e-cubed trilogy.

The unique multi-disciplinary theme of JSEE allows publication of new and cutting-edge processes and technologies across all areas of energy production, transportation, and transmission, including fossil fuels and renewable energy, as well as complementary topics such as water resources and energy infrastructure safety. More importantly, JSEE provides an ideal platform to report on the technical advances and scientific findings, exploring the key aspects of intersection of energy with the economy and environment. I am a true believer in the fact that most important advances occur when we delve into the edges and intersections of different disciplines. JSEE provides an effective forum to accomplish this objective.

While we will continue our main objective of publishing quality original papers, we also want to help reflect a wider spectrum of views. To create a vibrant forum for debate on the most pressing issues, I invite our distinguished editorial board members and our readers to volunteer writing editorials for the JSEE. We are also starting a new category of publication referred to as “Opinion Papers”. This is to encourage more extensive coverage of discussions on the important E-Cubed issues and to deal with many challenging problems from both scientific, engineering, and technical viewpoints.
