Research Anthology on BIM and Digital Twins in Smart Cities Management Association, Information Resources,2022-09-16 In recent years smart cities have been an emerging area of interest across the world Due to this numerous technologies and tools such as building information modeling BIM and digital twins have been developed to help achieve smart cities To ensure research is continuously up to date and new technologies are considered within the field further study is required The Research Anthology on BIM and Digital Twins in Smart Cities considers the uses challenges and opportunities of BIM and digital twins within smart cities Covering key topics such as data design urban areas technology and sustainability this major reference work is ideal for industry professionals government officials computer scientists policymakers researchers scholars practitioners instructors and students

New Advances in Building Information Modeling and Engineering Management María de las Nieves González García,Fernanda Rodrigues,João Santos Baptista,2023-07-31 This book explores the latest advances in the field of building management Several chapters use new technologies such as the BIM methodology for collecting life cycle information and managing the maintenance of existing buildings sharing valid historical and architectural heritage data energy analysis of building envelopes and planning new buildings or sustainable building practices In addition other tools are presented that focus on improving access to BIM information open source governance mobile applications to accelerate information transfer the use of blockchain lean design methods and open source software to solve critical path problems Some contributions feature the assessment of occupational risks in construction as it is necessary to plan preventive measures based on risk assessments integrated throughout the construction process which is another important element for the management of this sector

Industry 4.0 Solutions for Building Design and Construction Farzad Pour Rahimian,Jack Steven Goulding,Sepehr Abrishami,Saleh Seyedzadeh,Faris Elghaish,2021-12-20 This book provides in depth results and case studies in innovation from actual work undertaken in collaboration with industry partners in Architecture Engineering and Construction AEC Scientific advances and innovative technologies in the sector are key to shaping the changes emerging as a result of Industry 4 0 Mainstream Building Information Management BIM is seen as a vehicle for addressing issues such as industry fragmentation value driven solutions decision making client engagement and design process flow however advanced simulation computer vision Internet of Things IoT blockchain machine learning deep learning and linked data all provide immense opportunities for dealing with these challenges and can provide evidenced based innovative solutions not seen before These technologies are perceived as the true enablers of future practice but only recently has the AEC sector recognised terms such as golden key and golden thread as part of BIM processes and workflows This book builds on the success of a number of initiatives and projects by the authors which include seminal findings from the literature research and development and practice based solutions produced for industry It presents these findings through real projects and case studies developed by the authors and reports on how

these technologies made a real world impact The chapters and cases in the book are developed around these overarching themes BIM and AEC Design and Optimisation Application of Artificial Intelligence in Design BIM and XR as Advanced Visualisation and Simulation Tools Design Informatics and Advancements in BIM Authoring Green Building Assessment Emerging Design Support Tools Computer Vision and Image Processing for Expediting Project Management and Operations Blockchain Big Data and IoT for Facilitated Project Management BIM Strategies and Leveraged Solutions This book is a timely and relevant synthesis of a number of cogent subjects underpinning the paradigm shift needed for the AEC industry and is essential reading for all involved in the sector It is particularly suited for use in Masters level programs in Architecture Engineering and Construction

[Proceedings of CIRMARE 2023](#) João Carlos Gonçalves Lanzinha, Eduardo Linhares Qualharini, 2023-12-04 This book highlights the latest advances innovations and applications in the field of resilience and adaptation of buildings and cities to climate change as presented by international researchers at the VI International Conference on Recovery Maintenance and Rehabilitation of Buildings CIRMARE 2023 held in Covilh Portugal on December 5 7 2023 It covers a

diverse range of topics such as accessibility of buildings and urban spaces industrialization of rehabilitation processes interventions in cultural heritage building quality assessment maintenance and requalification of built spaces BIM and the digitization of construction urban planning circular economy in the construction sector urban infrastructure rehabilitation near zero energy buildings urban resilience and climate change recovery of degraded urban areas service life and pathologies in buildings The contributions which were selected by means of a rigorous international peer review process present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists

Proceedings of Conference on Sustainable Traffic and Transportation Engineering in 2023

Andrii Bieliatynskyi, Dmytro Komyshev, Wen Zhao, 2024-07-30 This open access book discusses modern cutting edge techniques and theoretical research in the domain of transportation engineering As China's Belt and Road Initiative BRI gains momentum over these years the construction of transport routes between China and its neighboring countries has seen an unprecedented rise which draws increased attention from researchers to the theoretical advances and technological innovation in the construction of transportation facilities It will be an invaluable asset for the development of transport infrastructure construction technologies worldwide Among the landmark engineering projects in the initiative are the Piraeus Port in Greece the 100 MW photovoltaic power plant in Hungary Kauposberg and the Monnet Railway in Kenya each of which stands out with its innovative highlights in theoretical research and technological advances The book is expected to share with global experts and engineers in the field of transportation advanced research results and technologies in construction from China discuss new research topics and explore feasible solutions in the realm of transportation engineering The main topics discussed in this book include a New theories and technologies for the construction of roads railroads subways airports bridges tunnels and other infrastructure b Advanced theories and technologies for the construction of ports dams reservoirs sluices hydraulic tunnels canals and other infrastructure c Novel materials and innovative application of these materials to the construction of transportation facilities This book is intended for graduate and doctoral students experts and engineers in the field of transportation engineering

Managing and Visualizing Your BIM Data

Ernesto Pellegrino, Manuel Andre Bottiglieri, Gavin Crump, Luisa Cypriano Pieper, Dounia Touil, 2021-11-25 Learn how to make optimum use of your BIM data using Dynamo to make better design decisions and create feature rich dashboards using Power BI to track your model's data Key Features A go to guide for AEC professionals to analyze and manage their data Explore popular use cases and best practices from experts around the world Create efficient dashboards using Dynamo and Power BI Book Description Business intelligence software has rapidly spread its roots in the AEC industry during the last few years This has happened due to the presence of rich digital data in BIM models whose datasets can be gathered organized and visualized through software such as Autodesk Dynamo BIM and Power BI Managing and Visualizing Your BIM Data helps you understand and implement computer science fundamentals to better absorb the process of creating Dynamo scripts and

visualizing the collected data on powerful dashboards This book provides a hands on approach and associated methodologies that will have you productive and up and running in no time After understanding the theoretical aspects of computer science and related topics you will focus on Autodesk Dynamo to develop scripts to manage data Later the book demonstrates four case studies from AEC experts across the world In this section you ll learn how to get started with Autodesk Dynamo to gather data from a Revit model and create a simple C plugin for Revit to stream data on Power BI directly As you progress you ll explore how to create dynamic Power BI dashboards using Revit floor plans and make a Power BI dashboard to track model issues By the end of this book you ll have learned how to develop a script to gather a model s data and visualize datasets in Power BI easily What you will learn Understand why businesses across the world are moving toward data driven models Build a data bridge between BIM models and web based dashboards Get to grips with Autodesk Dynamo with the help of multiple step by step exercises Focus on data gathering workflows with Dynamo Connect Power BI to different datasets Get hands on experience in data management analysis and visualization techniques with guidance from experts across the world Who this book is for This book is for BIM managers BIM coordinators design technology managers and all AEC professionals who want to learn Autodesk Dynamo to analyze manage and visualize their BIM data as well as understand some associated computer science topics You need to have a background in BIM and knowledge of what a BIM model is to make the most of this book *Dynamo for Autodesk Revit: Simple and Practical* Samuel João Da Silveira,2023-01-27
