engaging knowledge management in a sharing economy In a hyper competitive business environment everything tends to be digital virtual and highly networked which raises the issue of how knowledge management can support the decision whether or not to share strategic resources or capabilities The book answers questions such as to what extent does the sharing economy preserve or compromise the competitive advantage of organizations And what are the knowledge management strategies for competitive yet cautious sharing dynamics *Idiot Engineering* Alfred Boediman,Ridi Ferdiana,2020-12-17 We all especially software engineers are on a journey of enhancing Artificial Intelligence AI Some of us have even dedicated our lives to it Every part of the journey is astonishing including the challenges we encounter Our struggles sometimes lead to ineffective outcomes and because of this some people consider what we are doing or what we have done boring or even idiotic Nevertheless this journey would not be fulfilling without all the highs and lows Whether or not we agree with it AI is here and here to stay What we need to do is embrace Artificial Intelligence and we need to enjoy the journey But how do we enjoy it This book will help us do that by explaining the definition of AI the potentials and the risks of AI how to work on AI how to utilize AI and how to increase AI literacy through education *The De Gruyter Handbook of Automated Futures* Vaike Fors,Martin Berg,Meike Brodersen,2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind *The De Gruyter Handbook of Automated Futures* provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation *Scrum For Dummies* Mark C. Essentials of Marketing Analytics, 1e Joseph F. Hair (Jr.), Dana E. Harrison, Haya Ajjan, 2021. We developed this new book with enthusiasm and great optimism. Marketing analytics is an exciting field to study and there are numerous emerging opportunities for students at the undergraduate level and particularly at the master's level. We live in a global, highly competitive, rapidly changing world that is increasingly influenced by digital data, expanded analytical capabilities, information technology, social media, artificial intelligence, and many other recent developments. We believe this book will become the premier source for new and essential knowledge in data analytics, particularly for situations related to marketing decision making that can benefit from marketing analytics, which is likely 80 percent of all challenges faced by organizations.
