Corporations and Citizenship Andrew Crane, Dirk Matten, Jeremy Moon, 2008-08-28

It is widely accepted that corporations have economic, legal, and even social roles. Yet the political role of corporations has yet to be fully appreciated. *Corporations and Citizenship* serves as a corrective by employing the concept of citizenship in order to make sense of the political dimensions of corporations. Citizenship offers a way of thinking about roles and responsibilities among members of polities and between these members and their governing institutions. Crane, Matten, and Moon provide a rich and multi-faceted picture that explores three relations of citizenship: corporations as citizens, corporations as governors, and corporations as arenas of citizenship for stakeholders, as well as three contemporary reconfigurations of citizenship: cultural identity-based, ecological, and cosmopolitan citizenship. The book revolutionizes not only our understanding of corporations but also of citizenship as a principle of allocating power and responsibility in a political community.
