Introduction to Machine Learning Algorithms Vinod Kumar Khanna, 2026-04-09 Mathematics is the foundation of machine learning algorithms. This book serves as an introductory resource outlining the preliminary concepts and offering insights into the mathematical foundations and operational mechanisms of machine learning algorithms. It describes the basic equations and interrelates the questions arising during practical applications of machine learning with the basic mathematical picture of the algorithms used. Features: Introduces machine learning, highlights the central role of algorithms in machine learning, and explains the core mathematical prerequisites to understanding machine learning algorithms. Systematically examines the sequential steps of classical machine learning algorithms used for classification of data sets into distinct groups: regression, clustering, analysis. Provides an overview of value policy and model-based reinforcement learning algorithms. This book is for academicians, scholars, students, and professionals engaged in the study of machine learning and artificial intelligence. *Let's Git Nakid*,

THE HUMAN GAME Rachan, 2026-01-08 You're playing a game you never agreed to join. One where your starting position was decided before you took your first breath. And the rules? They're hidden in plain sight, whispered in family networks, enforced by algorithms, and repeated across generations in Bangkok boardrooms, Mumbai startups, Singapore banks, and Kuala Lumpur trading floors. Most people lose, quietly grinding harder while connected players advance effortlessly, chasing money and status only to feel empty at the top, drowning in noise while real opportunities slip away, sacrificing truth for belonging in tribes that demand conformity. *The Human Game: Operating Without Illusion* promises something different: not another hustle manifesto or mindset trick, but a clear-eyed blueprint to see the mechanics that actually shape outcomes, define your private win condition of autonomy, coherence, and meaning, build high-trust alliances that multiply leverage, and turn time's exponential engine in your favor, all while navigating Asia's intense hierarchies, family obligations, and digital

pressures with calm mastery Written by Rachan an observer who has lived and worked across Thailand India Malaysia Singapore Indonesia and Vietnam this book distills structural truths from real streets and real lives not abstract theory but patterns seen in night markets corporate towers hawker stalls and quiet family dinners If you re tired of feeling life is somehow rigged despite your effort intelligence and good intentions If you sense there s a clearer freer way to move through the noise This is your map Stop reacting Start playing without illusion
