

1. Introduction

Garment Business today becomes very competitive. Low price, less lead time, high costing, many competitors made the market saturated. Depending on the level of journey, this business came to a professional and scientific stage, where accurate planning, proper time management in production and operation, high skilled technical support, optimum cost-profit estimation are very important issues to survive. Now a day's, it is impossible to run a garment manufacturing operation without scientific and professional approach. Industrial Engineering concepts are developed on this demand. Industrial Engineering concepts are required in every stage including Costing, Product R&D, Planning, Supply Chain, Production Management, Maintenance Management, Layout plan, Productivity Improvement, Cutting Improvement, and Manpower Skill Development and so on. Every Garment Owner now understands that only scientific and professional approach can make the profit.

2. Concept of Production & Productivity

2.1 Production:

Production is any progress or procedure developed to transform a set of input elements like men, machinery, capital, information and energy into a set of output elements like finished products and services in proper quality and quantity, thus achieving the objectives of an enterprise (Buffa and Sarin, 2009).
