Artificial Intelligence in Traditional Medicine Research and Application Taoyang Wu, Lihong Peng, Jidong Lang, Michael Heinrich, 2026-02-24

Traditional medicine (TM) represents a vast body of knowledge and practices aimed at preventing, diagnosing, improving, or treating both physical and mental illnesses. Despite significant advancements, there remain critical challenges that demand ongoing research in this field. These include issues such as the variability and the poorly defined composition of traditional medicine preparations, the lack of standardization, and insufficient quality data on their efficacy. Moreover, there are ongoing debates about how best to integrate traditional and biomedical practices within modern healthcare systems. The advent of artificial intelligence (AI) has introduced a new dimension to this domain. Recent breakthroughs in AI, including machine learning and deep learning, have begun to enhance the efficacy, understanding, and procedural efficiency of traditional medicine. This Research Topic aims to explore the transformative potential of AI in traditional medicine while addressing the significant hurdles that accompany its application.
