The Autocrat's Predicament Timothy R. Heath, 2023-11-03

In their quest for national revival China's leaders under Xi Jinping have sought to improve the economy's performance. The disappointing economic record of authoritarian regimes provides ample grounds for doubt yet not all have failed. Why have some succeeded where most did not? The theory of the enabling condition highlights the central role that politics plays in the pursuit of economic advancement. The theory explains that a political situation characterized by a strong central leadership, weak elite opposition, and a united public offers favorable prospects for enacting concentrated growth policies. This arrangement enables the central leadership to enlist the public in convincing elites to implement policies that they might otherwise resist. Focusing on the experience of single party authoritarian regimes, *The Autocrat's Predicament: The Political Peril of Economic Upgrade in Single Party Authoritarian Regimes* examines episodes in the histories of the People's Republic of China, Taiwan, and the Soviet Union. It concludes that China's unfavorable political situation could be potentially unfriendly for its ambitions to build an efficient, highly productive economy. Public Health in the Arab World Samer

Politics, Social Theory, Utopia and the World-System C. el-Ojeili, 2012-01-25. It is common to hear that we live in unique, turbulent, and crisis-ridden times, and this turbulence, transformation, and crisis are said to be deeply significant, perhaps threatening for the human sciences. Responding to such claims, this book provides an accessible engagement with pressing contemporary topics such as violence, social movements, equality, identity, and democracy. Foregrounding the imagination of possibilities, utopia, the mapping of the present, theory, and the transformation of the world system, historical and global questions, the book surveys central issues and paradigms in contemporary political sociology, urging a recommitment to certain concepts and traditions for guidance in thinking and acting in the world.

Reducing Inequality for Shared Growth in China World Bank, 2011. The report recommends an overall strategy and specific policy measures to eliminate absolute poverty, reduce inequality in opportunities, and contain inequality in development outcomes.

Land Fragmentation in Agriculture Malcolm F. McPherson, 1983. *The Water Problem* Pat Mulroy, 2017-03-28. Building water resilience is the single biggest challenge in a changing global climate. The United States faces a water crisis as critical as the energy crisis that once dominated headlines. Like the energy crisis, a solution can be found. Pat Mulroy, for many years general manager of the Southern Nevada Water Authority, the lead negotiator on the Colorado River for the State of Nevada, and a Brookings fellow, has gathered a number of practitioners and scholars to show us why we face a crisis caused by climate change and what we can do to alleviate it. While the focus recently has been on California with its water restrictions and drought, many other parts of the United States are also suffering from current and potential water shortages that will only be exacerbated by climate change. *The Water Problem* takes us to Miami and the problem of rising oceans fouling freshwater reservoirs, Kansas and Nebraska where intensive farming is draining age-old aquifers, and to the Southwest United States where growing populations are creating enormous stresses on the already

strained Colorado River Mulroy and her contributors explore not just the problems but also what we can do now to put in place measures to deal with a very real crisis **The World Bank and the Environment** World Bank,1993
