Beyond the Burn Jeremiah Davidson LSW, 2025-10-06 It was 2007 when Jeremiah Davidson first walked into Burning Man A month shy of his twenty ninth birthday he had just graduated from college and moved to Las Vegas to begin a career in event marketing As he gazed at the unbelievable scene sprawled across the desert Davidson had no idea that his decision to attend Burning Man would soon spark amazing worldly adventures and a passion for human connections In an inspirational true story Davidson details how his journey from a childhood filled with farms mountains coffee shops and raves led him to attend Burning Man ultimately weaving a life of intentionality as a citizen

of Black Rock City While creating a lasting desert camp and organizing international participation Davidson was motivated to embody purposeful humanity Davidson offers his perspectives of Burning Man s 10 Principles as well as a glimpse into his personal explorations and triumphs despite nuanced timing challenging logistics and depleting dust storms Beyond the Burn details one man s yearly journey to a cultural desert event and how the experiences influenced a more joyful creative and fulfilling life a return to self society and source *Tech* Olivier Alexandre,2025-09-23 The first holistic analysis of the space mindset and inner workings of Silicon Valley in a generation Sometimes only an outsider can show how an industry works and how that industry works upon the world In Tech sociologist Olivier Alexandre takes us on a revealing tour of Silicon Valley s prominent personalities and vibrant networks to capture the way its denizens live think relate and innovate and how they shape the very code and conduct of business itself Even seasoned observers will gain insight into the industry s singular milieu from Alexandre s piercing eye He spends as much time with Silicon Valley s major players as with those who fight daily to survive within a system engineered for disruption Embedded deep within the community Alexandre accesses rooms shut tight to the public and reports back on the motivations ambitions and radical vision guiding tech companies From the conquest of space to quantum computing engineers have recast the infinitely large and small Some scientists predict the end of death and the replacement of human beings with machines But at what cost Alexandre sees a shadow hanging over the Valley jeopardizing its future and the economy made in its image Critical yet fair Tech illuminates anew a world of perpetual revolution *Chess Life* ,2006
