COMPUTATIONAL FLUID DYNAMICS AND HEAT TRANSFER

PROF. GAUTAM BISWAS
Department of Mechanical Engineering
IIT Kanpur

PRE-REQUISITES : First and Second year Mathematics Courses. The basic core course in Fluid Mechanics and a basic core course in Heat Transfer
INTENDED AUDIENCE : BTech (UG) in Mechanical, Chemical and Aerospace; MSc in Mathematics; MTech (PG) in Mechanical (Fluids and Thermal), MTech in Aerospace Engineering
INDUSTRIES APPLICABLE TO : DRDO Labs, Some CSIR Labs, BHEL, Thermax, GE etc

COURSE OUTLINE :

This course is an effort to cover a range of topics, - from elementary concepts for the uninitiated students to state-of-the-art algorithms useful for the practitioners. The contents begin with preliminaries, in which the basic principles and techniques of finite difference (FD), finite volume (FV) and finite element (FE) methods are described using detailed mathematical treatment. The methodologies are explained using step-by-step calculations. The popular CFD solvers, such as SIMPLE and MAC have been discussed in a detailed manner so that the learners can handle such programming paradigms with confidence. Some fundamental mathematical aspects of turbulent flows have been explained to enable the learners modeling the complex turbulent flows and associated heat transfer.

ABOUT INSTRUCTOR :

Prof. Gautam Biswas is presently a Professor of Mechanical Engineering at the Indian Institute of Technology Kanpur. Earlier, he has been the Director of Indian Institute of Technology Guwahati, and Director of the CSIR-Central Mechanical Engineering Research Institute at Durgapur. He was the G.D. and V.M. Mehta Endowed Chair Professor, and Dean of academic affairs at IIT Kanpur. The research group of Professor Biswas at IIT Kanpur identified the phenomenon of Rayleigh-Taylor Instability during the bubble formation in film boiling. This was a significant addition to the classical theory, based on Taylor Helmholtz instability. Another seminal contribution of his group is identification of zone of large bubble entrapment and underlying physics during the complete coalescence of a falling drop on a liquid surface. Professor Biswas is the author of more than 150 publications in the International Journals. He has completed guidance of 23 PhD theses. He was a Humboldt Fellow in Germany in 1987-88 and JSPS invited fellow in Japan 1994. He is a Fellow of the American Society of Mechanical Engineers (ASME). He has served a full term as the Associate Editor of the Journal of Heat Transfer (Trans ASME). He was a Guest Professor at the University of Erlangen-Nuremberg in 2002. Currently he is Associate Editor of a well-known CFD-Journal, - Computer and Fluids.Prof Gautam Biswas is a Fellow of the all three major Science Academies of India, such as, the Indian National Science Academy (INSA), New Delhi, the Indian Academy of Sciences (IAS), Bangalore) and the National Academy of Sciences India (NASI, Allahabad). He is a Fellow of the Indian National Academy of Engineering (INAE) and Institution of Engineers India (IEI). He has been awarded the esteemed J.C. Bose National Fellowship by the Department of Science and Technology, New Delhi in 2011. Prof. Biswas was bestowed with Distinguished Alumnus Award by BESU (now IIEST, Shibpur) in the year 2013. He has been awarded the Distinguished Alumnus Award by the Indian Institute of Technology Kharagpur in 2016. Prof. Biswas was conferred Honorary Doctorate (Honoris Causa) by National Institute of Technology Agartala, India, in 2017. Introduction To Computational Fluid Dynamics Iit Kanpur:

    Introduction to Computational Fluid Dynamics Atul Sharma,2016 This book is primarily for a first one semester course on CFD in mechanical chemical and aeronautical engineering Almost all the existing books on CFD assume knowledge of mathematics in general and differential calculus as well as numerical methods in particular thus limiting the readership mostly to the postgraduate curriculum In this book an attempt is made to simplify the subject even for readers who have little or no experience in CFD and without prior knowledge of fluid dynamics heattransfer and numerical methods The major emphasis is on simplification of the mathematics involved by presenting physical law instead of the traditional differential equations based algebraic formulations discussions and solution methodology The physical law based simplified CFD approach proposed in this book for the first time keeps the level of mathematics to school education and also allows the reader to intuitively get started with the computer programming Another distinguishing feature of the present book is to effectively link the theory with the computer program code This is done with more pictorial as well as detailed explanation of the numerical methodology Furthermore the present book is structured for a module by module code development of the two dimensional numerical formulation the codes are given for 2D heat conduction advection and convection The present subject involves learning to develop and effectively use a product a CFD software The details for the CFD development presented here is the main part of a CFD software Furthermore CFD application and analysis are presented by carefully designed example as well as exercise problems not only limited to fluid dynamics but also includes heat transfer The reader is trained for a job as CFD developer as well as CFD application engineer and can also lead to start ups on the development of apps customized CFD software for various engineering applications Atul has championed the finite volume method which is now the industry standard He knows the conventional method of discretizing differential equations but has never been satisfied with it As a result he has developed a principle that physical laws that characterize the differential equations should be reflected at every stage of discretization and every stage of approximation This new CFD book is comprehensive and has a stamp of originality of the author It will bring students closer to the subject and enable them to contribute to it Dr K Muralidhar IIT Kanpur INDIA   Introduction to Computational Fluid Dynamics Atul Sharma,2021-08-26 This more of physics less of math insightful and comprehensive book simplifies computational fluid dynamics for readers with little knowledge or experience in heat transfer fluid dynamics or numerical methods The novelty of this book lies in the simplification of the level of mathematics in CFD by presenting physical law instead of the traditional differential equations and discrete independent of continuous math based algebraic formulations Another distinguishing feature of this book is that it effectively links theory with computer program code This is done with pictorial as well as detailed explanations of implementation of the numerical methodology It also includes pedagogical aspects such as end of chapter problems and carefully designed examples to augment learning in CFD code development application and analysis This book is a valuable
