Homo Faber:

Homo Faber Max Frisch, Max Frisch este un observator neutru al unor fapte care abundă în emoție dar pe care alege să le trateze rațional. A cum ar notăm un raport ridic astfel o întrebare la care nu îți propune să dea un răspuns ci mai degrabă îți oferă cititorului toate informațiile cu care sîi poată formula singur răspunsul este viaa doar rațiune logică în ordine sau pot emoțiile coincidențele și chiar destinul să ne ghideze drumul și de zi Homo Faber nu pune în lumină antiteze precum rațiune versus credință sau emoție versus logică ci mai degrabă observă viaa de la o distanță suficient de mare încât să nu spună mai mult decît trebuie spus și să nu descopere mai mult decît trebuie descoperit. Homo Faber Max Frisch, 1959 Loneliness and despair invade the world of an engineer who comes to realize that he has failed as a friend husband and father *Homo Faber* Max Frisch, 1957

Homo Faber Robert McAfee Brown, Pacific Coast Theological Society, 1971 **Perspectives on Max Frisch** Gerhard F. Probst, Jay F. Bodine, 2021-12-14 Max Frisch with his countryman Friederich Diirrenmatt shares the place of eminence in contemporary Swiss literature. Indeed he ranks high among the recent leading writers in the German language. But although several of his works novels and plays have been translated into English he remains little known in America. In this collection of essays an international group of scholars provides a fresh introduction to this noted author. The three leading essays review Frisch's work in the forms he has used most extensively drama narrative fiction and the personal diary. The remaining nine essays focus on specific works or topics. Among the works examined are *I m Not Stiller* *A Wilderness of Mirrors* *Wilhelm Tell* and the recent *Man in the Holocene*. Among the topics are Frisch's use of language and images his treatment of women and the element of parody. Concluding the volume is the most complete bibliography on Frisch to appear in English to date.

Homo Faber Paolo Benanti, 2018-12-07T10:18:00+01:00 In *Homo Faber* Paolo Benanti seeks to provide a philosophical and theological understanding of the technological phenomenon by casting light contemporaneously on the ethical dimensions connected to it. In constructing a holistic vision of technique technology he asks himself how to look at the technological artifacts how it was possible that the West has undergone an incomparable technological development in respect to any other human culture and what this reveals and means for technology and what is the context in which technology is implemented and understood today. As a result of his journey Benanti shows how Technology is not a simple human activity but human nature is a techno-human condition. **The Public Realm and the Public Self** Shiraz Dossa, 1989-02-21 On pp 28-36 *The Holocaust* and pp 125-141 *Eichmann* discusses a reinterpretation of the controversy over Arendt's views on the origins of totalitarianism the guilt of the Jews and the evilness of Eichmann. Suggests that one has to interpret Eichmann's behavior as that of a private man entering the public realm aiming to achieve private self-interests. Contends that use of this terminology and way of thinking can explain Arendt's apparent inconsistencies in her views on the Holocaust. *The Concept of Work in the History of European Philosophy* Gene Callahan, 2025-09-30 This volume offers a historical overview of philosophical thinking about work in a Western context. While philosophy has for a long time been

interested in the liberative aspects of politics including justice liberty or equality and there are also major philosophical works on the culture of play the topic of work seems to have escaped philosophy's primary focus This is surprising as since the middle of the 19th century the world of work has been at the centre of political struggle and social conflict This collection of essays on how major European thinkers have conceptualised work aims to fill this gap and provides the first concise yet substantial history of philosophical ideas about work The Concept of Work in the History of European Philosophy is essential reading for all scholars researchers and advanced students of the history of philosophy It is also ideal for scholars in related fields such as organisational theory and the history of economic thought

Entropy and Creativity, a Dialectical Approach Nikola Kajtez, 2023-10-16 This book positions entropy and creativity as key philosophical categories and presents the action of entropy and the notion of creativity on the informational natural scientific social humanistic and metaphysical levels In this sense the book expands the scale of the civilization envisioned by Nikolai Kardashev and Carl Sagan deepens the readership's understanding of the anthropic principle and the paradigm concept provides a layered explanation and solution to the Fermi paradox corrects the parameters of the Drake equation explores singularity outside of the traditional framework of this term and points to the philosophical potential of such an expansion and presents a unique chain of being from elementary information to the totality of all possible worlds

Homo Faber George Nugent Merle Tyrrell, 1985

Homo Faber G. N. M. Tyrrell, 2019-06-07 Originally published in 1951 *Homo Faber* is an examination of the scientific outlook on human mental evolution through the lens of parapsychology The book aims to undermine what its terms the scientific outlook examining the human interpretation of the world and the preconceived scientific concepts that reality does not extend beyond the realm that our senses reveal The book expands upon this and

moves to examine the broader human understanding of the entire cosmos challenging the scientific conception that this can be grasped in principal by human intellect arising from the chance combination of material particles The book argues that the scientific outlook prevents humans from discovering in the Universe the meaning and purpose which are everywhere to be found if sought in the appropriate contemplative states of mind This book provides a unique take on the examination of human psychology and the evolution of the brain from an alternative scientific stance It will be of interest to anthropologists historians and psychologists alike
