Experimental Science George Milton Hopkins,1906 *Learning Science in Out-of-School Settings* Nancy Longnecker,Daniel H. Solis,Chantal Lise Barriault,Marianne Lykke,2022-09-05 Experimental Science : Elementary, Practical and Experimental Physics George Milton Hopkins,1911 **Data Cleaning and Exploration with Machine Learning** Tirupathi Rao Dockara,2025-12-02

DESCRIPTION Machine learning has become central to how organizations handle data in today s world With businesses generating vast amounts of information the ability to clean explore and model data effectively is no longer optional it is a critical skill for decision making innovation and competitive advantage This book takes readers on a structured journey starting with Python foundations and essential libraries It discusses data cleaning preprocessing and exploratory analysis and then explores text and time series data dimensionality reduction regression classification and clustering techniques Advanced topics such as model evaluation neural networks deep learning retrieval augmented generation and explainable AI are covered in detail which are supported by real world examples and case studies Each chapter builds progressively ensuring both theoretical grounding and practical application and vital industry practices By the end of the book readers will be equipped with the skills to handle raw datasets uncover patterns build and evaluate ML models and apply advanced techniques responsibly You will be confident in applying these methods to solve problems in their domains making yourself a competent data practitioner ready to deliver insights and drive impact

WHAT YOU WILL LEARN Understand Python foundations and essential data science libraries Apply data cleaning methods to handle missing or noisy data Perform exploratory data analysis using statistics and visualization Work with text time series and high dimensional datasets Build regression classification and clustering ML models Evaluate models with metrics validation and hyperparameter tuning Explore neural networks deep learning and explainable AI techniques Implement real world case studies and capstone data projects

WHO THIS BOOK IS FOR This book is for data analysts data scientists ML engineers and business professionals who want to strengthen their skills in data preparation and modeling It is also valuable for students researchers and software developers aiming to apply ML techniques effectively in real world projects
