Facebook Romantasy S Compare:

Facebook Phantom Suzanne Sangi, 2013 *The Impact of Facebook on Social Comparison and Happiness* Ayala Arad, Ohad Barzilay, Maayan Perchick, 2017

The ubiquity of Facebook in modern life compels us to study its effects on well being. We study a unique sample of users and non users in a security related organization where Facebook usage was manipulated by an organizational policy change initially banning Facebook altogether and later differentially restricting its usage. Thus the assignment to the group of non users was circumstantial rather than due to a priori personal characteristics which makes it possible to identify Facebook's impact on social comparison and happiness. We find that Facebook usage increases users engagement in social comparison and consequently decreases their happiness. Social comparison mediates the effect of Facebook on happiness but only for the younger half of our sample and only for those who believe that others have many more positive experiences than they do. Surprisingly we find that Facebook does not cause users to overestimate the frequency of their friends positive experiences.
