2009 and many people having their first internet experience over a mobile device rather than a PC mobility is changing people's lives for the better. This is a huge responsibility and test for companies in the business. But Nokia's CEO Olli Pekka Kallasvuo is claiming that his company has always been good at adapting to both change and challenges. This work examines how well the world largest cell phone manufacturer is prepared to maintain customer's continuous trust in their company and products, what is their strategy to continue success while changing. The work examines in three steps Nokia's strategy execution: the corporate strategy level, the business level strategy, and the marketing strategy level. Finally, the analysis results are collectively examined in the SWOT analysis before drawing the conclusion for which of the various generic competitive strategies Nokia is deploying.

Analysis of Multinational Strategic Management Alan M. Rugman, Alain Verbeke, 2005

Characterized by new analytical insights and methods in the field of international business, this collection of articles by Alan Rugman and Alain Verbeke celebrates their long and productive work together on issues facing top managers of multinational enterprises. Fueled by their belief in the need for better theory in multinational strategic management, the authors have explored a number of different facets in this increasingly important realm. They have organized the work into five sections: the foundations of a new theory of multinational strategic management, a radically new examination of multinational strategic management, national competitiveness, the relatively under-researched but increasingly important issue of environmental strategies of multinational enterprises, and the interactions between multinational strategic management and public policy. This outstanding collection, inspired by the occasion of Alan Rugman's 60th birthday, will be of great interest to scholars and practitioners of international business and management, as well as to economists and lawyers.
